## Not Recommended Hard Disk Drives

Manufacturer	Model Number	Size (GB)	Notes
<b>Seagate</b>	ST2000DL003 (9VT1CC32)	2000	Note 3
<b>WD</b>	WD20EARS	2000	Note 3
<b>WD</b>	WD15EARS	1500	Note 3
<b>WD</b>	WD10EARS	1000	Note 3
<b>WD</b>	WD20EADS	2000	Note 3
<b>WD</b>	WD20EVDS	2000	Note 3
<b>WD</b>	WD15EADS	1500	Note 3
<b>WD</b>	WD10EADS	1000	Note 3

### Note 1

As suggested by certain hard disk drive providers, the hard disk drives of the same brand and series are collectively recognized as compatible with CELVIN NAS Servers if the largest-capacity drive has passed the compatibility test.

### Note 2 (WD RE4-GP WD2002FYPS)

For improved stability, upgrade your firmware. Western Digital firmware released after after Nov 15, 2009 is suggested.

### Note 3 (WD Green & Seagate Green)

These hard disk drives have passed QNAP lab's initial verification of compatibility. However, because many users have reported unstable experience with these hard disk drives, we do not recommend using these hard disk drives with CELVIN NAS Servers. WD10EADS-00P8B0 and WD15EADS-00P8B0 are not suggested because of slow performance and stability issues.

### Note 4 (Hitachi 7K1000.C HDS721010CLA332 1TB)

Since the design of the screw position of this hard disk drive model is slightly different from others, the hard disk drives of 2-bay and 4-bay CELVIN NAS Servers may not be detected properly. Please plug the hard disk drive tray into the drive bay until it clicks into place to avoid hard disk drive detection error.

### Note 5 (WD Desktop Hard Drives)

The hard disk drives have passed the lab's initial verification of compatibility.

However, the manufacturer does not recommend desktop hard disk drives in business-critical RAID environments because the drives may not work correctly. Please check this [link](#) for more information.

### Note 6 (Samsung HD204UI 2TB)

To use this hard disk model with QNAP products, please back up the disk data (if any) and follow the guide below to apply the patch for improved data integrity.

<http://forums.seagate.com/t5/Samsung-Internal-Drives/HD204UI-Firmware-patch/m-p/143115#M20>

### Note 7

CELVIN NAS Server supports a disk volume of larger than 16 TB. To use these models with your CELVIN NAS Server, please upgrade the NAS firmware to v3.4.0 or later. A disk volume of less than 16TB of storage can only be expanded to maximum 16TB by online RAID capacity expansion or adding hard drives. Online RAID capacity expansion and adding hard drives are not supported for a disk volume of over 16TB.

**Note 8**

If a HDD SMART test is performed on a drive concurrently with data access, the drive might be ejected from the RAID volume. To solve this issue, please upgrade firmware to 3.6.3 or above.

**Note 9**

These hard drives models have passed the lab's compatibility verifications. However, some users have reported unstable experiences with these hard drives. The manufacturer has released a new firmware version for these hard drive models. Please check this [link](#) for more information.

**Note 10**

Please upgrade the NAS firmware to 3.7.x for enhanced compatibility with this hard drive mode

Please check our support website <http://support.ts.fujitsu.com> for an updated version of this compatibility list.

**Note 1**

D-Link DCS-5220 (B1) is not the compatible camera model.

**Note 2**

For ACTi TCM and KCM series, you can define resolution and fps of second stream on camera's page for streaming from server and local display. Default resolution is VGA.

**Note 3**

Only the brand can be searched, not model name.

**Note 4**

No support in 3.7.

Please check our support website <http://support.ts.fujitsu.com> for an updated version of this compatibility list.

**Note1**

As suggested by certain UPS providers, the UPS of the same brand and series are collectively recognized as compatible with CELVIN NAS Servers if the largest-capacity UPS has passed the compatibility test.

Please check our support website <http://support.ts.fujitsu.com> for an updated version of this compatibility list.
