

# HUAWEI HiSecEngine USG6600F&USG6700F Series AI Firewalls

## 1 Overview

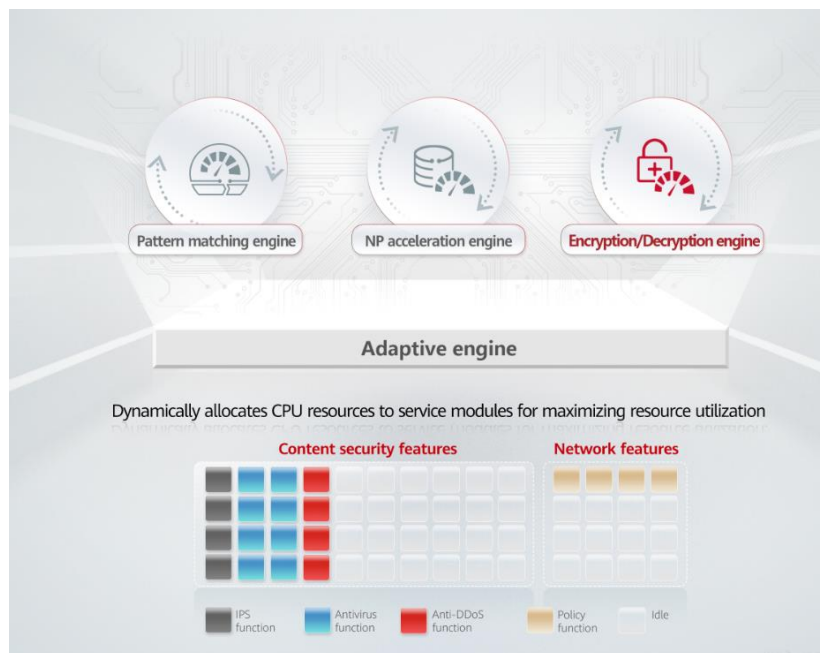

As digitalization is sweeping the world, extensive connections, explosive growth of data, and booming intelligent applications are profoundly changing the way we live and work. Enterprise services are going digital and moving to the cloud, which promotes the transformation of enterprise networks while bringing greater challenges to network security. As threats increase, unknown threats are ever-changing and highly covert. As users' requirements for security services increase, performance and latency become bottlenecks. With mass numbers of security policies and logs, threat handling and O&M are extremely time-consuming. As the "first gate" on network borders, firewalls are the first choice for enterprise security protection. However, traditional firewalls can only analyze and block threats based on signatures and therefore are unable to effectively handle unknown threats. In addition, the effectiveness of threats depends on the professional experience of O&M personnel. The single-point, reactive, and in-event defense method cannot effectively defend against unknown threat attacks, let alone threats hidden in encrypted traffic.

With new hardware and software architectures, Huawei HiSecEngine USG6600F&USG6700F Series are next-generation AI firewalls that feature intelligent defense, outstanding performance, and simplified O&M, effectively addressing the preceding challenges. The HiSecEngine USG6600F&USG6700F Series uses intelligence technologies to enable border defense to accurately block known and unknown threats. Equipped with multiple built-in security-dedicated acceleration engines, the USG6000F series firewalls support enhanced forwarding, content security detection, and IPsec service processing acceleration. The security O&M platform implements unified management and O&M of multiple types of security products, such as firewalls, anti-DDoS devices, reducing security O&M OPEX.

## 2 Product Highlights

### Excellent performance

By leveraging fresh-new hardware and software architectures of forwarding and control separation, HiSecEngine USG6600F&USG6700F Series AI firewalls dynamically allocate resources to service modules through the adaptive security engine (ASE), maximizing resource utilization and improving overall service performance. For core services, the HiSecEngine USG6600F&USG6700F Series also supports network processor (NP), pattern matching, and encryption/decryption engines. These engines greatly improve short-packet forwarding, reduce the forwarding latency, and enhance application identification, intrusion prevention detection, and IPsec service performance.

## Intelligent defense

HiSecEngine USG6600F&USG6700F Series AI firewalls provide content security functions, such as application identification, IPS, antivirus, and URL filtering to protect intranet servers and users against threats. HiSecEngine USG6600F&USG6700F Series also support to detect unknown threats by interworking with sandbox.

Traditional IPS signatures are manually produced through analysis, resulting in low productivity. Also, the accuracy of the signatures depends heavily on expert experience. Huawei innovatively enables the IPS signature production on the intelligent cloud by adopting intelligence technologies and utilizing expert experience. Such an intelligent mode helps increase the signature productivity by 30 times compared with manual production, reduce errors caused by manual analysis, and continuously improve the accuracy of intrusion detection.

The built-in antivirus content-based detection engine (CDE) powered by intelligence technologies can detect unknown threats and provide in-depth data analysis. With these capabilities, the CDE-boosted firewall is able to gain insight into threat activities and quickly detect malicious files, effectively improving the threat detection rate.

HiSecEngine USG6600F&USG6700F Series supports to detect and defend malware spreading and network attacks, like Worm, Virus, Trojan-horse, Spyware, etc. malware spreading and botnet, DoS/DDoS, SQL injection, cross site attack, ransomware, etc.

## Simplified O&M

The HiSecEngine USG6600F&USG6700F Series provides a brand-new web UI, which intuitively visualizes threats as well as displays key information such as device status, alarms, traffic, and threat events. With multi-dimensional data drilling, the web UI offers optimal user experience, enhanced usability, and simplified O&M.

The HiSecEngine USG6600F&USG6700F Series can be centrally managed by the security management platform SecoManager, implementing a shift from single-point defense to collaborative network protection. The SecoManager provides policy tuning and intelligent O&M capabilities. It can also manage security products, such as anti-DDoS devices to quickly eliminate network threats and improve security handling effectiveness.

The HiSecEngine USG6600F&USG6700F Series can also be managed by NCE-Campus, and NCE-Campus can also support to manage switch, AR, POL device at the same time, even third party devices.

## A wide range of network features

Huawei HiSecEngine USG6600F&USG6700F Series also provides various network features such as VPN, IPv6, and intelligent traffic steering.

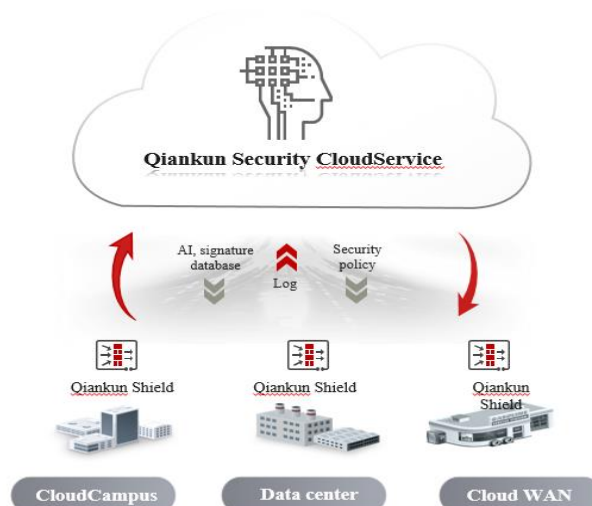

- Provides various VPN features such as IPsec VPN and SSL VPN, and supports multiple encryption algorithms, such as DES, 3DES, AES, and SHA, ensuring secure and reliable data transmission.

- Provides secure and rich IPv6 network switchover, policy control, security protection, and service visualization capabilities, helping government, media, carrier, Internet, and finance sectors implement IPv6 reconstruction.
- Provides dynamic and static intelligent traffic steering based on multi-egress links, selects the outbound interface based on the specified link bandwidth, weight, or priority, forwards traffic to each link based on the specified traffic steering mode, and dynamically tunes the link selection result in real time to maximize the usage of link resources and improve user experience.

## Collaboration with Huawei Qiankun Security Cloud Service

- Most threats and attacks come from network traffic. Firewalls are deployed at the egress of the local network to interwork with Huawei Qiankun security cloud service to implement automatic threat analysis and handling. This ensures the interconnection between the intranet and extranet, effectively intercepts traffic attacks, and automatically handles external attack sources. Protects enterprise network resources.

- By associating with Huawei Qiankun security cloud service, the firewall can obtain security services such as border protection and response on demand. Lightweight

deployment and unified cloud O&M effectively reduce hardware stacking and greatly reduce enterprise security investment and O&M difficulties.

### 3 Deployment

#### Small data center border protection

- Firewalls are deployed at egresses of data centers, and functions and system resources can be virtualized. The firewall has multiple types of interfaces, such as 100G, 40G, 10G, and 1G interfaces. Services can be flexibly expanded without extra interface cards.
- The intrusion prevention capability effectively blocks a variety of malicious attacks and delivers differentiated defense based on virtual environment requirements to guarantee data security.
- VPN tunnels can be set up between firewalls and mobile workers and between firewalls and branch offices for secure and low-cost remote access and mobile working.

#### Enterprise border protection

- Firewalls are deployed at the network border. The built-in traffic probe can extract packets of encrypted traffic to monitor threats in encrypted traffic in real time.
- The policy control and data filtering functions of the firewalls are used to monitor social network applications to prevent data breach and protect enterprise networks.

### 4 Product Appearance

## 5 Software Features

Feature	Description
<b>Integrated protection</b>	Integrates firewall, VPN, intrusion prevention, antivirus, bandwidth management, Anti-DDoS, and URL filtering functions, and provides a global configuration view and integrated policy management.
<b>Application identification and control</b>	Application identification based on signatures, correlation, and behaviors instead of ports; 6000+ preset applications, which can be further classified; support for user-defined applications; 50+ categories and 20+

	risk labels for access control based on categories and labels; automatic update of the application identification signature database
<b>Security policy management</b>	Supports traffic management and control based on the VLAN ID, 5-tuple, security zone, region, application, and time range, and implements integrated content security inspection. Provides predefined templates for common attack defense scenarios to facilitate security policy deployment. Supports interworking with third-party policy management software (FireMon and AlgoSec) to facilitate security O&M.
<b>Bandwidth management</b>	Manages per-IP bandwidth based on service application identification to guarantee the network experience of key services and users. The management and control can be implemented by limiting the maximum bandwidth, guaranteeing the minimum bandwidth, and changing the application forwarding priority.
<b>Intrusion prevention</b>	Obtains the latest threat information in a timely manner and accurately detects and prevents vulnerability exploits; covers tens of thousands of CVE vulnerabilities; prevents the exploit of vulnerabilities (such as those in Windows and Unix/Linux operating systems, databases, Apache, IIS, and Tomcat as well as middleware), web attacks (such as SQL injection, XSS, and RCE), botnets, remote control, and Trojan horses; supports brute force cracking detection based on user behavior; provides 25,000+ predefined signatures and supports user-defined signatures and automatic signature database update; supports attack forensics collection, full-flow packet obtaining (including three-way handshake information), and attack fragment display to facilitate O&M; supports X-Forwarded-For (XFF) field extraction.
<b>WAF</b>	Uses signature, semantic analysis, and machine learning technologies to detect OWASP top 10 attacks, such as SQL injection, cross-site scripting, RCE, CSRF, and deserialization, and supports anti-leeching and web page anti-tampering; supports HTTP method and field length control.
<b>Antivirus</b>	Detects malware in files transmitted through protocols like HTTP, FTP, SMTP, POP3, IMAP4, NFS, and SMB; detects Trojan horses, worms, spyware, vulnerability exploits, adware, hacker tools, Rootkit, backdoors, grayware, botnet programs, ransomware, phishing software, cryptojacking software, and web shell programs; supports virus detection for Office files, executable files (Windows/Linux/macOS), script files, flash files, PDF files, RTF files, web pages, and images; supports attack forensics collection; supports the inspection of archive files of up to 100 nested compression levels in multiple compression formats, such as tar, gzip, zip, rar, and 7z, and supports multiple actions, such as alert, block, add declaration, and attachment deletion.
<b>Advanced malware prevention</b>	The heuristic antivirus engine uses detection technologies such as AI, semantic analysis, and Emulator, coupled with threat and reputation information, to detect packed malware, script morphing, and malware

	<p>embedded in compound documents. It can detect billions of malware variants and supports automatic update of the signature database. In addition, it can send suspicious files to the local or cloud sandbox for further inspection to detect zero-day malware.</p>
<b>Web security</b>	<p>The URL category database on the cloud contains 560 million URLs in over 130 categories, such as news, games, gambling, drugs, and malicious web pages. URLs cover over 100 languages, and key categories of URLs cover over 20 languages. The URL category query servers are deployed in multiple countries/regions to provide high-speed and low-latency category query services. User-defined URL/host whitelist and blacklist are supported. HTTPS traffic can be filtered without decryption. TLS/SSL traffic can be decrypted before filtering. HTTP/2 and QUIC traffic can be filtered, and URL categories can be imported in batches.</p> <p>Supports Safe Search enforcement across five major search engines: YouTube, Bing, Google, Yahoo, and Yandex, with mandatory filtering of illegal or inappropriate content in search results.</p> <p>URL access can be controlled based on users/user groups, time ranges, and security zones to precisely manage users' online behaviors.</p>
<b>DNS security</b>	<p>Based on massive threat information, technologies such as AI and knowledge graph are used to detect malicious DNS requests, including C&amp;C domain names, DGA-generated domain names, compromised sites, and malicious domain names such as cryptojacking, ransomware, and phishing domain names. The local malicious domain name database supports a maximum of 2 million malicious domain names.</p> <p>DNS category-based filtering, DNS safe search, and DNS redirection (sinkholing) are also supported.</p>
<b>Anti-botnet/spyware</b>	<p>Supports the detection and prevention of viruses and advanced malware, such as botnets, Trojan horses, worms, remote control tools, and spyware, and prevents the download of malware; quickly detects malicious traffic like C&amp;C based on signatures, IP addresses, and domain reputation information; displays the roles of communication parties in botnet attack logs.</p>
<b>Threat information</b>	<p>Huawei Intelligent Security Center leverages multiple AI algorithms and expert analysis to generate massive threat information about IP addresses, domain names, URLs, and files on a daily basis. The threat information is automatically synchronized to devices for threat detection to quickly block emerging attacks. In addition, it can interconnect with third-party threat information sources to enrich inspection rules.</p>
<b>OT/IoT security</b>	<p>Supports common industrial control protocols such as Modbus, S7, Profinet, and OPC, identification and control of IoT devices such as cameras, and IoT asset risk assessment. Supports vulnerability detection</p>

	<p>for IoT devices like cameras and industrial control software and protocols like ICS/SCADA.</p> <p>The traffic probe function, coupled with HiSec Insight situational awareness system, can learn the traffic behavior baseline of IoT assets and detect and evaluate IoT asset risks.</p> <p>1. For details about the list of supported OT protocols, see <a href="https://isecurity.huawei.com/security/wiki/application">https://isecurity.huawei.com/security/wiki/application</a> (Business Systems &gt; Industrial).</p> <p>2. Firewalls are deployed at Level 3.5 or above of the Purdue model.</p>
<b>Flow probe</b>	<p>Collects and parses metadata and attack forensics information, including network-layer metadata (such as IP addresses, ports, and packet characteristics) and application-layer metadata (such as field information obtained after in-depth parsing of protocols like HTTP, DNS, TLS, and SSH), and sends the data to the HiSec Insight security situational awareness platform for further analysis by using algorithms, such as deep learning and machine learning algorithms, to detect potential, unknown, and advanced threats in network traffic.</p>
<b>Anti-DDoS</b>	<p>Uses technologies such as source IP address detection, fingerprint detection, and dynamic traffic limiting to defend against over 10 common DDoS attacks and over 20 single-packet attacks, such as SYN flood, UDP flood, ICMP flood, HTTP flood, HTTPS flood, DNS flood, and SIP flood attacks, and supports traffic baseline learning and IP reputation-based filtering.</p>
<b>Mail filtering</b>	<p>Supports mail address filtering (covering the sender and recipient addresses) and SMTP mail sending rate limiting.</p>
<b>DLP</b>	<p>Supports identification of 100+ real file types, user-defined file name extensions, and file type-based upload/download control; supports keyword filtering for Office documents, web pages, code, and TXT files; supports user-defined keywords, regular expressions, and weight configuration.</p>
<b>SaaS access control</b>	<p>Supports SaaS application identification and access control based on signatures, DNS, IP addresses (IP address database of the top 50 SaaS applications), and first packets, and supports traffic steering based on SaaS applications, ensuring good SaaS application experience.</p>
<b>Behavior audit</b>	<p>Audits and regulates common user online behaviors, including FTP operations (upload, download, and command), HTTP operations (posting, search, and browsing), DNS, Telnet, SNMP, and email sending and receiving operations.</p>
<b>Intelligent uplink selection</b>	<p>Supports service-specific PBR and intelligently selects the optimal link based on multiple types of load balancing criteria (such as the bandwidth ratio and link health status) in multi-ISP scenarios.</p>
<b>VPN encryption</b>	<p>Supports various highly reliable VPN features, such as IPsec VPN, SSL VPN, and GRE, and multiple encryption algorithms, such as DES, 3DES,</p>

	AES, SHA, SM2, SM3, and SM4.
<b>SSL-encrypted traffic inspection</b>	Detects and defends against threats hidden in TLS/SSL-encrypted traffic, performs application-layer protection, such as intrusion prevention, antivirus, data filtering, and URL filtering, on decrypted TLS/SSL traffic, and supports URL category whitelist.
<b>SSL offloading</b>	Replaces the server to implement SSL encryption and decryption, reducing the server load and implementing load balancing of HTTP traffic.
<b>Diversified reports</b>	Provides visualized and multi-dimensional reports by IP address, application, time, traffic, or threat.
<b>Security virtualization</b>	Supports virtualization of multiple types of security services, including firewall, intrusion prevention, antivirus, and VPN services; allows users to separately conduct personalized management on the same physical device.
<b>Routing</b>	Supports multiple types of IPv4/IPv6 routing protocols, such as RIP, OSPF, BGP, IS-IS, RIPng, OSPFv3, BGP4+, and IPv6 IS-IS.
<b>IP multicast</b>	Supports IPv4 Layer 3 multicast protocols, such as IGMP, MSDP, and PIM, and provides point-to-multipoint services to reduce bandwidth consumption.
<b>Server load balancing</b>	Supports IPv6, Layer 4/Layer 7 server load balancing, and multiple session persistence methods such as source IP address-based and HTTP cookie-based session persistence; supports SSL offloading and encryption; combines services and security policies to improve service security; supports health check based on multiple protocols such as TCP, RADIUS, DNS, and HTTP to detect server status changes promptly.
<b>Deployment and reliability</b>	Supports transparent (Layer 2), routing (Layer 3), tap, and hybrid working modes and high availability (HA), including the Active/Active and Active/Standby modes.
<b>Security center</b>	The built-in asset identification module can identify assets such as Windows, Linux, Android, and iOS assets and cameras, perform correlation analysis on threat logs and assets, and display asset risk assessment results and the entire kill chain.
<b>SRv6</b>	Supports IS-IS for SRv6, BGP for SRv6, SRv6 BE, SRv6 TE policy, SRv6 midpoint protection, SRv6 microloop avoidance, SRv6 OAM, SRv6 SRH compression, SRv6 TI-LFA FRR, and EVPN L3VPN.
<b>Secure SD-WAN</b>	Provides a built-in secure SD-WAN solution for low-cost and business-level Internet links. Supports zero-touch provisioning (ZTP) through email to complete device provisioning in minutes without requiring technical skills. Supports forward error correction (FEC) to prevent pixelated display and

	<p>video freezing at a 30% packet loss rate; supports real-time link switching based on link quality ensure key application experience.</p> <p>Supports multi-link routing and dual-CPE flexible networking to ensure uninterrupted connections for site services; supports E2E IPsec encryption to ensure secure service transmission.</p>
<b>User authentication</b>	<p>Supports multiple authentication modes for Internet access users, including local Portal authentication and single sign-on (SSO). In local Portal authentication, the built-in Portal page of the device can be pushed to users, and the account and password entered on the Portal page by a user can be sent to the local database or RADIUS, HWTACACS, AD, or LDAP authentication server for authentication. SSO includes RADIUS SSO and Agile Controller (NCE-Campus) SSO.</p>
<b>O&amp;M capability</b>	<p>Supports telemetry to automatically read information from hardware, such as fans, power modules, optical modules, Ethernet ports, temperature sensors, and drivers, and sends interface traffic statistics, CPU usage, and memory usage to the collector.</p>
<b>PPPoE</b>	<p>Functions as a PPPoE client to provide Internet access services, including user authentication and authorization and dynamic IP address allocation.</p>
<b>Firewall Interworking with Huawei Qiankun Security CloudService</b>	
<b>Service</b>	<b>Description</b>
<b>Border protection and response service</b>	<p>Intrusion detection and prevention: Leverages signatures to block application-layer attacks, terminates the transfer of phishing emails and malware (such as viruses and Trojan horses), detects compromised hosts on the internal network, and disconnects these hosts from the Internet to protect the security and stability of customer services.</p>
	<p>Automatic event analysis: Combines intelligent analysis and manual analysis by experts to analyze security events to ensure the accuracy of attack blocking and security alarms and optimize attack identification rules.</p>
	<p>Whitelist and blacklist: Supports whitelist and blacklist configuration on the Portal or app to protect services from threats.</p>
	<p>Periodic security reports: Generates weekly and monthly reports on security protection events and sends the reports to users by email.</p>
	<p>Emergency notification: Identifies emergencies from security events and sends notifications to users via SMS and email.</p>

## 6 Specifications

### System Performance and Capacity

Model	USG6615F	USG6625F	USG6635F	USG6655F
IPv4 Firewall Throughput <sup>1</sup> (1518/512/64-byte, UDP)	15/15/15 Gbps	25/25/25 Gbps	35/35/35 Gbps	50/50/40 Gbps
IPv6 Firewall Throughput <sup>1</sup> (1518/512/84-byte, UDP)	15/15/15 Gbps	25/25/25 Gbps	35/35/25 Gbps	50/50/25 Gbps
Secure SD-WAN EVPN Throughput(1400/512 byte,UDP) <sup>9</sup>	15/15 Gbps	25 /25 Gbps	35/35 Gbps	50/40 Gbps
Secure SD-WAN EVPN tunnels	3,000	3,000	6,000	6,000
Firewall Latency (64-byte, UDP)	18 μs	18 μs	18 μs	18 μs
Firewall Latency <sup>8</sup> (64-byte, UDP)	7 μs	7 μs	7 μs	7 μs
Concurrent Sessions (HTTP1.1) <sup>1</sup>	10,000,000	10,000,000	20,000,000	20,000,000
New Sessions/Second (HTTP1.1) <sup>1</sup>	250,000	250,000	500,000	500,000
FW + SA* Throughput <sup>2</sup>	12Gbps	12Gbps	23Gbps	26.5Gbps
NGFW Throughput <sup>3</sup> (HTTP 100K)	6Gbps	10Gbps	16Gbps	25Gbps
NGFW Throughput(Enterprise Mix) <sup>4</sup>	4.6Gbps	5Gbps	8Gbps	8.5Gbps
Threat Protection Throughput (FW + SA + IPS + AV, HTTP 100K) <sup>7</sup>	5.4Gbps	9Gbps	12Gbps	22.5Gbps
Threat Protection Throughput (Enterprise Mix) <sup>5</sup>	4Gbps	4Gbps	7Gbps	8Gbps
IPsec VPN Throughput <sup>1</sup> (AES- 256 + SHA256, 1420-byte)	15Gbps	25Gbps	30Gbps	30Gbps
Maximum IPsec VPN Tunnels	20,000	20,000	20,000	20,000
SSL Inspection Throughput <sup>7</sup>	2.5 Gbps	2.5 Gbps	4 Gbps	4 Gbps
SSL VPN Throughput <sup>6</sup>	1 Gbps	2 Gbps	3 Gbps	3 Gbps
Concurrent SSL VPN Users *(Default/Maximum)	100/4,000	100/8,000	100/10,000	100/10,000
Security Policies (Maximum)	50,000	50,000	150,000	150,000
Virtual Firewalls	2048	2048	2048	2048

<b>URL Filtering: Categories</b>	More than 130
<b>URL Filtering: URLs</b>	A database of over 500 million URLs in the cloud
<b>Automated IPS Signature Updates</b>	Yes, an industry-leading security center from Huawei( <a href="http://sec.huawei.com/sec/web/index.do">http://sec.huawei.com/sec/web/index.do</a> )
<b>Third-Party and Open-Source Ecosystem</b>	Open API for integration with third-party products, providing NETCONF interfaces. Other third-party management software based on SNMP, SSH, and Syslog
<b>VLANs (Maximum)</b>	4094
<b>VLANIF Interfaces (Maximum)</b>	4094

Model	USG6685F	USG6636F	USG6656F	USG6686F
<b>IPv4 Firewall Throughput<sup>1</sup> (1518/512/64-byte, UDP)</b>	80/80/40 Gbps	35/35/35 Gbps	50/50/40 Gbps	80/80/40 Gbps
<b>IPv6 Firewall Throughput<sup>1</sup> (1518/512/84-byte, UDP)</b>	80/80/25 Gbps	35/35/25 Gbps	50/50/25 Gbps	80/80/25 Gbps
<b>Secure SD-WAN EVPN Throughput<sup>9</sup>(1400/512 byte,UDP)</b>	50/40 Gbps	35/35 Gbps	50/40 Gbps	50/40 Gbps
<b>Secure SD-WAN EVPN tunnels</b>	6,000	6,000	6,000	6,000
<b>Firewall Latency (64-byte, UDP)</b>	18 μs	18 μs	18 μs	18 μs
<b>Firewall Latency<sup>8</sup> (64-byte, UDP)</b>	7μs	7 μs	7 μs	7 μs
<b>Concurrent Sessions (HTTP1.1)<sup>1</sup></b>	25,000,000	20,000,000	20,000,000	25,000,000
<b>New Sessions/Second (HTTP1.1)<sup>1</sup></b>	750,000	500,000	500,000	750,000
<b>FW + SA* Throughput<sup>2</sup></b>	26.5Gbps	23Gbps	26.5Gbps	26.5Gbps
<b>NGFWThroughput<sup>3</sup>(HTTP 100K)</b>	25Gbps	16 Gbps	25 Gbps	25 Gbps
<b>NGFW Throughput(Enterprise Mix)<sup>4</sup></b>	8.5Gbps	8 Gbps	8.5 Gbps	8.5 Gbps
<b>Threat Protection Throughput (FW + SA + IPS + AV, HTTP 100K) <sup>7</sup></b>	22.5Gbps	12Gbps	22.5Gbps	22.5Gbps
<b>Threat Protection Throughput (Enterprise Mix)<sup>5</sup></b>	8Gbps	7 Gbps	8 Gbps	8 Gbps

IPsec VPN Throughput <sup>1</sup> (AES-256 + SHA256, 1420-byte)	30Gbps	30 Gbps	30 Gbps	30 Gbps
Maximum IPsec VPN Tunnels	20,000	20,000	20,000	20,000
SSL Inspection Throughput <sup>7</sup>	4 Gbps	4 Gbps	4 Gbps	4 Gbps
SSL VPN Throughput <sup>6</sup>	5 Gbps	3 Gbps	3 Gbps	5 Gbps
Concurrent SSL VPN Users *(Default/Maximum)	100/10,000	100/10,000	100/10,000	100/10,000
Security Policies (Maximum)	150,000	150,000	150,000	150,000
Virtual Firewalls	2048	2048	2048	2048
URL Filtering: Categories	More than 130			
URL Filtering: URLs	A database of over 500 million URLs in the cloud

NGFW Throughput <sup>3</sup> (HTTP 100K)	40Gbps	50Gbps	75Gbps

<b>NGFW Throughput(Enterprise Mix)<sup>4</sup></b>	16Gbps	17Gbps	26Gbps
<b>Threat Protection Throughput (FW + SA + IPS + AV, HTTP 100K) <sup>7</sup></b>	38Gbps	45Gbps	68Gbps
<b>Threat Protection Throughput (Enterprise Mix)<sup>5</sup></b>	14Gbps	16Gbps	24Gbps
<b>IPsec VPN Throughput<sup>1</sup> (AES-256 + SHA256, 1420-byte)</b>	60Gbps	60Gbps	90 Gbps
<b>Maximum IPsec VPN Tunnels</b>	100,000	100,000	120,000
<b>SSL Inspection Throughput<sup>7</sup></b>	8 Gbps	8 Gbps	12 Gbps
<b>SSL VPN Throughput <sup>6</sup></b>	10 Gbps	10 Gbps	12 Gbps
<b>Concurrent SSL VPN Users *(Default/Maximum)</b>	100/20,000	100/20,000	100/30,000
<b>Security Policies (Maximum)</b>	160,000	160,000	160,000
<b>Virtual Firewalls</b>	2048	2048	2048
<b>URL Filtering: Categories</b>	More than 130		
<b>URL Filtering: URLs</b>	A database of over 500 million URLs in the cloud		
<b>Automated IPS Signature Updates</b>	Yes, an industry-leading security center from Huawei( <a href="http://sec.huawei.com/sec/web/index.do">http://sec.huawei.com/sec/web/index.do</a> )		
<b>Third-Party and Open-Source Ecosystem</b>	Open API for integration with third-party products, providing NETCONF interfaces. Other third-party management software based on SNMP, SSH, and Syslog		
<b>VLANs (Maximum)</b>	4094		
<b>VLANIF Interfaces (Maximum)</b>	4094		

1. Performance is tested under ideal conditions based on RFC2544, 3511. The actual result may vary with deployment environments.
2. SA performances are measured using 100 KB HTTP files.
3. NGFW throughput is measured with Firewall, SA, and IPS enabled; the performance is measured using 100 KB HTTP files.
4. NGFW throughput is measured with Firewall, SA, and IPS enabled; the performance is measured using the Enterprise Mix Traffic Model.
5. The threat protection throughput is measured with Firewall, SA, IPS, and AV enabled; the performance is measured using the Enterprise Mix Traffic Model.
6. SSL VPN throughput is measured using TLS v1.2 with AES128-SHA.
7. SSL inspection throughput is measured with IPS-enabled and HTTPS traffic using TLS v1.2 with TLS\_ECDHE\_RSA\_WITH\_AES\_128\_GCM\_SHA256.
8. The data test condition is the interface pair mode .

9. The SD-WAN tunnel is packed with GRE over IPSec.

## 7 Hardware Specifications

Model	USG6615F	USG6625F	USG6635F	USG6655F
Chassis Height	1 U			
Dimensions (H x W x D) mm	43.6 x 442 x 420			
Fixed Interface	8*GE COMBO + 4*GE RJ45 + 4*GE SFP + 6*10GE SFP+		8*GE COMBO + 4*GE RJ45 + 10*10GE SFP+	
USB Port	1 x USB 3.0			
Weight	6.3 kg		7.3 kg	
External Storage	Optional, SATA (1 x 2.5 inch) supported, 240GB/480GB/960GB/1920GB/3.84TB, hot-swappable			
Power Supply(AC)	100 V to 240 V			
Maximum power consumption of the machine	222 W		242 W	
Power Supplies	Optional dual AC power supplies		Dual AC power supply	
Operating Environment (Temperature/Humidity)	Temperature: 0°C to 45°C Humidity: 5% to 95%, non-condensing			
Non-operating Environment	Temperature: -40°C to +70°C Humidity: 5% to 95%, non-condensing			
Installation Type	Rack			

Model	USG6685F	USG6636F	USG6656F	USG6686F
Chassis Height	1 U			
Dimensions (H x W x D) mm	43.6 x 442 x 420			
Fixed Interface	8*GE COMBO + 4*GE(RJ45)+ 10*10GE(SFP+)	2*100GE(QSFP28) + 2*40G(QSFP+)+ 4*SFP28 + 10*SFP+ + 8GE COMBO		
USB Port	1 x USB 3.0	1 x USG3.0		
Weight	7.3 kg	8.035kg		
External Storage	Optional, SATA (1 x 2.5 inch) supported, 240GB/480GB/960GB/1.92TB/3.84TB, hot-swappable			
Power Supply (AC)	100V ~ 240V , 50Hz/60Hz			
Maximum power consumption of the machine	242 W	183W		

Power Supplies	Dual AC power supplies
Operating Environment (Temperature/Humidity)	Temperature: 0°C to 45°C Humidity: 5% to 95%, non-condensing
Non-operating Environment	Temperature: -40°C to +70°C Humidity: 5% to 95%, non-condensing
Installation Type	Rack

Model	USG6710F	USG6715F	USG6725F
Chassis Height	1 U		
Dimensions (H×W×D) mm	43.6 x 442 x 600		
Fixed Interface	2*100GE(QSFP28) + 2*40G(QSFP+)+ 8*25(ZSFP+) + 20*10GE(SFP+) <sup>1</sup>		4*100GE(QSFP28) + 16*25GE(ZSFP+) + 8*10GE(SFP+) <sup>2</sup>
USB Port	1 x USB 3.0		
Weight	10.26 kg		10.6 kg
External Storage	Optional, SATA (1 x 2.5 inch) supported, 240GB/480GB/960GB/1.92TB/3.84TB, hot-swappable		
Power Supply (AC)	100V ~ 240V, 50Hz/60Hz		
Maximum power consumption of the machine	391 W		445 W
Power Supplies	Dual AC power supplies		
Operating Environment (Temperature/Humidity)	Temperature: 0°C to 45°C Humidity: 5% to 95%, non-condensing		
Non-operating Environment	Temperature: -40°C to +70°C Humidity: 5% to 95%, non-condensing		
Installation Type	Rack (19-inch standard cabinet)		

1. Some 100GE interfaces and 25GE interfaces of USG6710F and USG6715F are mutually exclusive.
2. Some 100GE interfaces and 25GE interfaces of USG6715F are mutually exclusive.

## 8 Ordering Information

Note:

- 1、The ordering information of USG6625F/USG6635F/USG6655F/USG6685F/ USG6636F/ USG6656F/ USG6686F is the same of USG6615F
- 2、The ordering information of USG6710F/USG6715F is the same as USG6725F
- 3、The model USG6615F support Qiankun Security Cloud Service

Product	Model	Description
USG6615F	USG6615F-AC	USG6615F AC Host (8*GE COMBO + 4*GE RJ45 + 4*GE SFP + 6*10GE SFP+, 1 AC power supply)
USG6725F	USG6725F-AC	USG6725F AC Host (4*QSFP28 + 16*ZSFP+ + 8*SFP+,,2 AC power supplies)
