For your Safety

This User Manual is written for the users of the EM-101 series to assist in installation and operation. Please read this user manual carefully before installation and use.

Do not apply any power nor input/output cabling connection if this document is not fully read/understood or a visible damage is found on this device, including its accessories.

Do not remove the covers of this device.

Hazardous voltages are present within this equipment and may be exposed if the covers are removed. Only trained and approved service engineers are permitted to do service on this device.

The supplied AC/DC power adapter must be used to power the device. If the power adapter becomes damaged, it must be replaced.

No operator serviceable parts inside for the user.

For the correct and safe use of the device, it is essential that both operating and servicing personnel follow generally accepted safety procedures in addition to the safety precautions specified in this manual. Whenever it is likely that safety protection is impaired, the device must be made in-operative and secured against unintended operation. The appropriate servicing authority must be informed. For example, safety is likely to be impaired if the device fails to perform the intended measurements or shows visible damage.

Warnings & Recommendations

- Ambient temperature between 10C° to 30C°, relative humidity of 20% to 80% (non-condensed) are recommended.
- Avoid direct contact with water and direct sunlight.
- Keep free of dust and excessive vibration.
- The outside of the chassis may be cleaned using a lightly dampened cloth. Do not use any cleaning liquids containing alcohol, methylate nor ammonia etc.
- This product should be placed on a flat surface, leaving 3~5cm free space above it for cooling (ventilation & radiation in nature equilibrium).
- When in operation, the ambient temperature should not exceed the limit of 45C°.

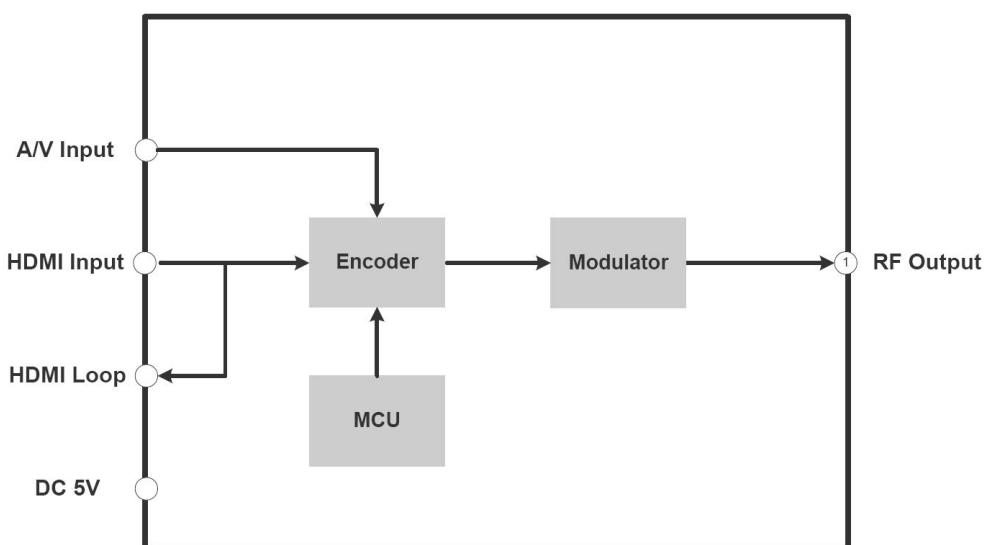

EM-101 Digital TV Standalone Encoder & Modulator

1. General Introduction

EM101x is an integrated base band TV signals to DVB-T/C digital RF TV signal conversion unit (Analog_to_Digital and RF output).

Analog AV or digital HDMI base band signal can be encoded, multiplexed and modulated onto one DVB-T/C RF carrier. The RF output signal could be easily mixed into the exist CATV or HFC network without disturbing the exist signals nor re-build the co-axial cabling network. Multiple STB's (Set Top Box) or integrated TV's can receive the clear & clean digitized TV signal simultaneously, and no professional reception equipment is needed. Transmission range over co-axial cable could be longer than 100m without degrade of signal quality. Suitable for private video distribution, community surveillance network, campus conference, factory on-site monitoring, hotel TV digitization, etc.

Block Diagram

2. Features

- Compliant with H.264/AVC BLP, MP, HP @ L4.0 or less, MPEG-2 MP@ML
- DVB-T or DVB-C RF output (factory options)
- HDMI & CVBS inputs
- HDMI Loop out (pass through)
- NTSC, PAL, SECAM & Video resolution auto detect
- NIT, SDT, LCN auto generation
- LCD display and Control with keyboard
- 30sec QuickSet menu for all parameters
- TS ID, PID, Service name & LCN collision prevention mechanism
- Support IR remote return (factory option)
- One service one device, low cost, easy to install, easy to maintain

Table 1

Standard configuration	EM101x			
	EM101-T	EM101-T+	EM101-C	EM101-C+

DVB-C RF output			*	*
CVBS input	●	●	●	●
HDMI input	●	●	●	●
HDMI loop output		●		●
LCD&Keyboard	●	●	●	●
H.264 HD/SD	●	●	●	●
MPEG2 SD	●	●	●	●
MPEG1 L2 Stereo	●	●	●	●
IR remote		*		*

* Note: under development, contact our sales/representatives for details.

3. Technical Specifications

Interface

- AV Input: CVBS, Audio_L/Audi0_R
- Connector type: phone jack for AV
- HDMI: HDMI in*1 (SD or HD)(HDCP) and HDMI*1 Loop Out
- LCD display: 2*16 characters
- Keyboard: 6 keys
- Reset: push button
- RF monitor: F-type female, 75Ω
- RF out: F-type female, 75Ω
- DC Input: 5V/3A, < 15W

Video Compression

- Analog Input: Analog NTSC, PAL and SECAM
- Digital Input: HDMI 1.4 (support HDCP)
- Compression Standard: H.264/AVC BLP, MP, HP @ L4.0 or less, MPEG-2 MP@ML
- Video Resolution & Recommend Compression Bit Rate H.264
1080i(1920×1080)@25Hz,29.97Hz,30Hz:SMPTE274M: 1.5~11Mb/s
720p (1280×720) @25Hz,29.97Hz,30Hz:SMPTE296M: 1.5~11Mb/s
480i (720×480) @29.97Hz:SMPTE656M: 500K~6Mb/s
576i (720×576) @25Hz: SMPTE656M:500K~6Mb/s
- Video Resolution & Recommend Compression Bit Rate MPEG-2
480i (720×480) @29.97Hz:SMPTE656M: 3.5~6Mb/s
576i (720×576) @25Hz: SMPTE656M: 3.5~6Mb/s
- Aspect Ratio: 4:3/16:9 auto detected
- Video Compression bit rate: 500K~13Mbps

Audio Compression:

- Audio Input Interfaces: HDMI or Analog
- Compression Standard: MPEG-1 Layer II
- Audio Sampling Rate: 48 KHz
- Audio Compression bit rate:
MPEG1 Layer II :32~192Kbps(mono), 64~384Kbps(stereo)

TS Processing

- PSI/SI: PAT, PMT, NIT, SDT and LCN auto generated

DVB-T Modulation (factory option)

- Constellation: QPSK/16QAM/64QAM
- Bandwidth: 6MHz, 7MHz, 8MHz
- FFT Mode: 2K, 8K
- Guard Interval: 1/4, 1/8, 1/16, 1/32
- Code Rate: 1/2, 2/3, 3/4, 5/6, 7/8
- MER: >38dB

RF Output

- Connector Type: 1×F type female,75 Ω (primary output)
- Output Frequency Range: 100~860MHz agile,step by 10KHz
- Output Level: 83~100dB μV, step by 1dB
- Spurious Rejection: 50dBc (typ.)
- Output Return Loss: 10dB (typ.)

Control & Monitoring

- Monitoring: LCD
- Control : keyboard

Physical

- Dimension : 195mm×145mm×40mm
- Net weight : 0.5kg
- Power Supply: DC 12V/1.5A,
- Power Consumption: Maximum 8W
- Operating Temperature: 0~45°C
- Storage Temperature: -10~60°C
- Operating Humidity: 10~90%,non-condensed

Note: All specifications are subject to change without notice.

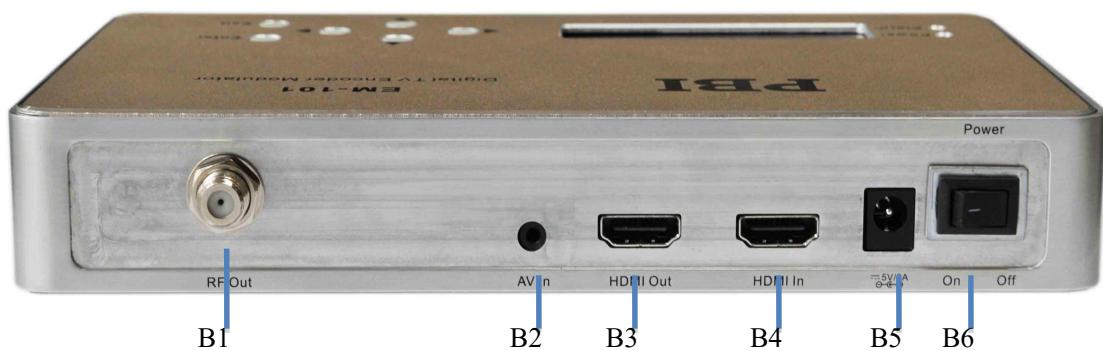

4. Description of Panels

4.1 Front Panel

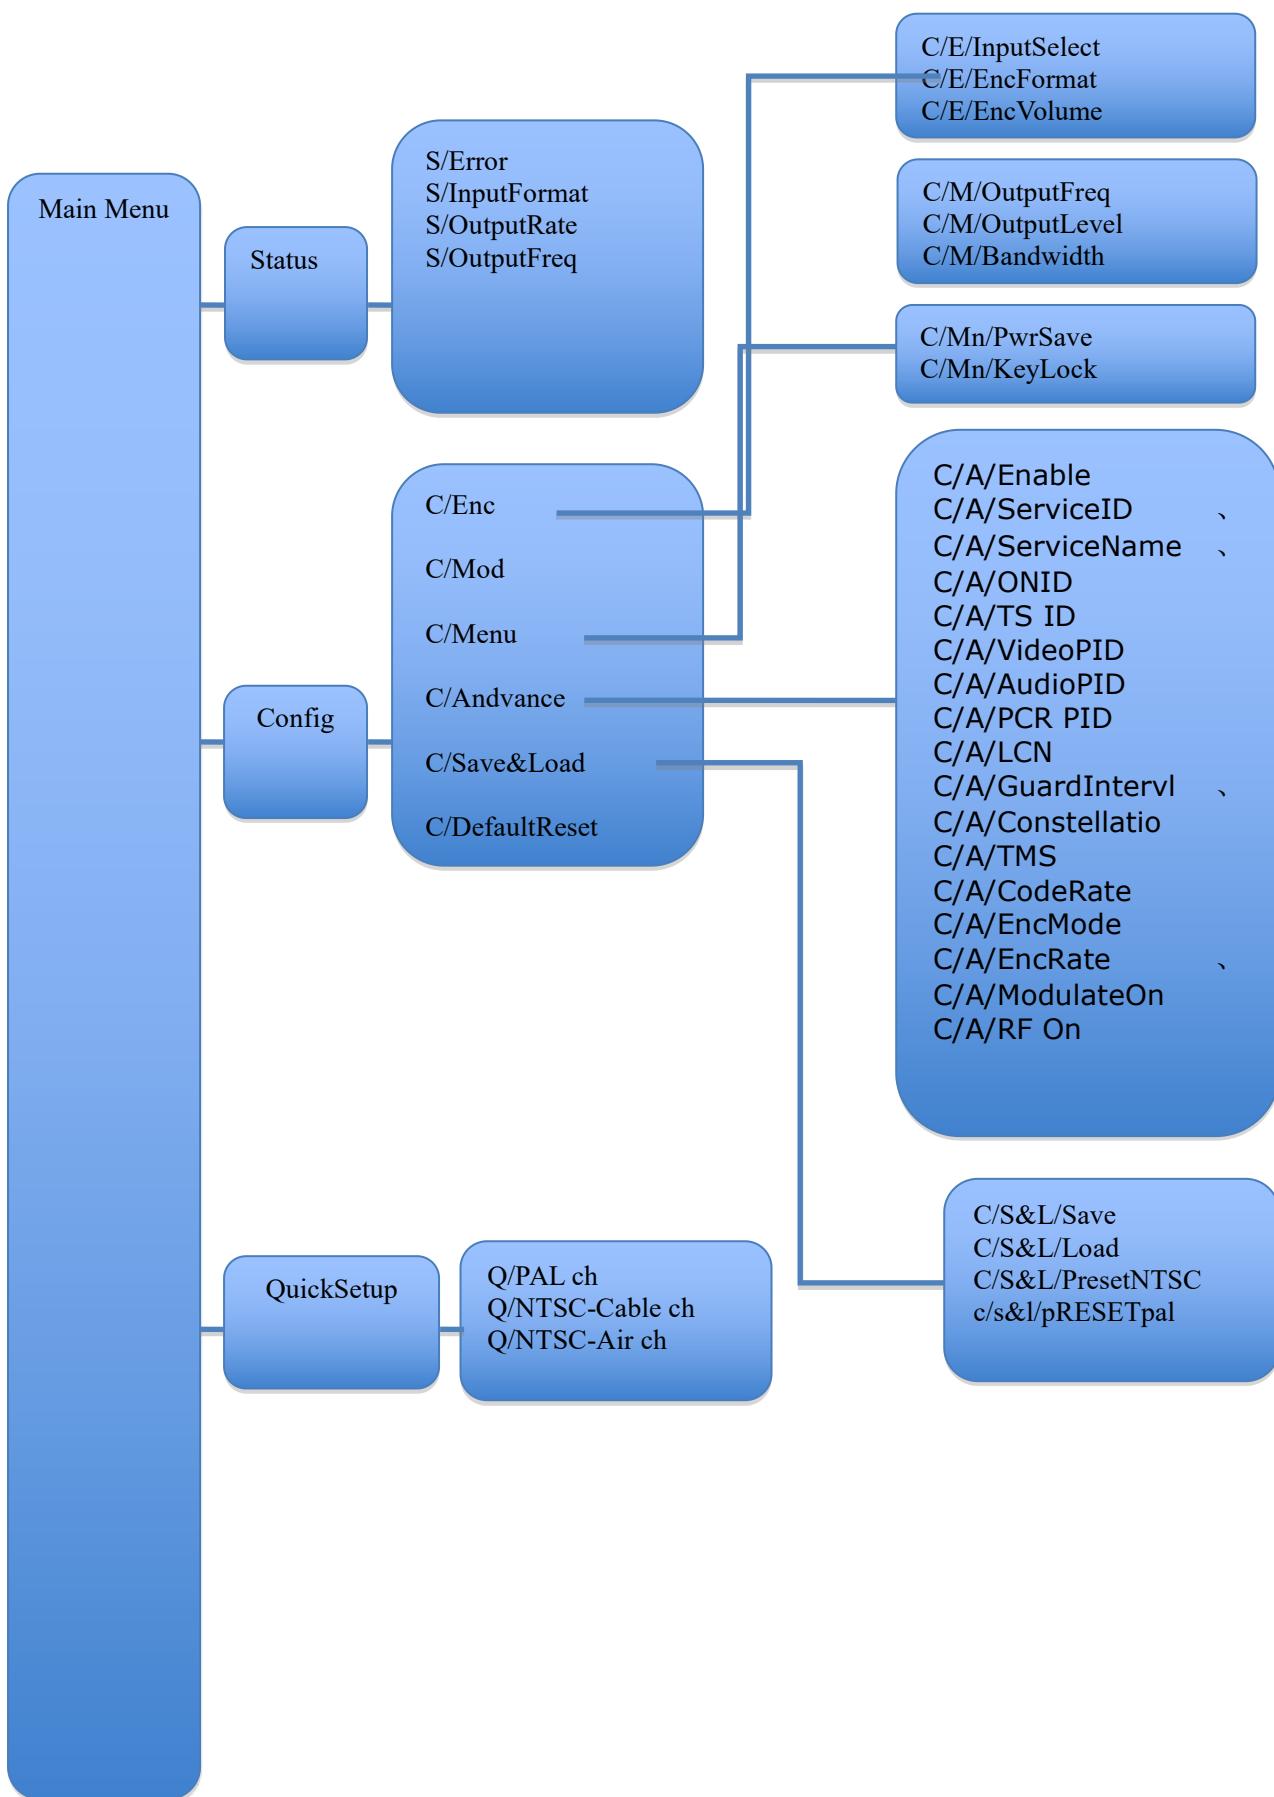

- A1 POWER indicator for power on
A2 ALARM indicator for Alarms, lighted when Alarm, warning or error occurred
A3 LCD 2X16 character LCD Display
A5-A10 keys they are [↑] [↓] [←] [→] [ENTER] & [EXIT]
[↑] [↓] [←] [→] are used for menu navigation and parameters entry
[ENTER] key is used for confirmation of operation, sub-menu entrance and settings entry
[EXIT] key is used for exiting the current layer of menu or discarding the setting just entered

4.2 Rear Panel

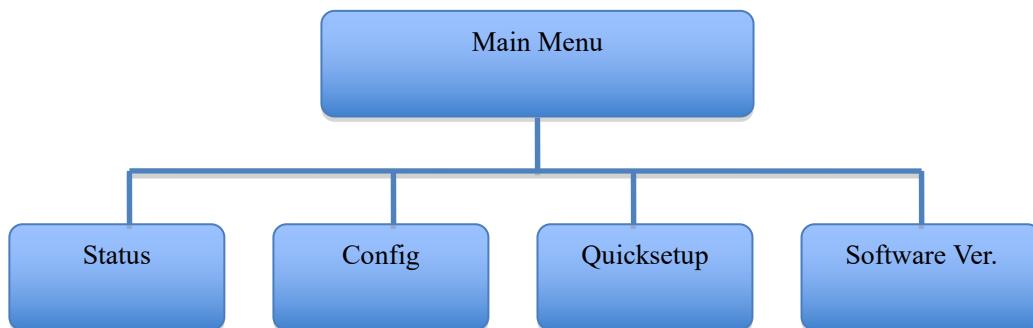

- B1 RF OUT RF output
B2 AV IN Analog A/V input
B3 HDMI OUT HDMI Loop-out output
B4 HDMI IN HDMI input
B5 Power socket 12V/1.5A DC power input
B6 Power Switch Power on or off

5. Menu Structure & operation

Software Ver

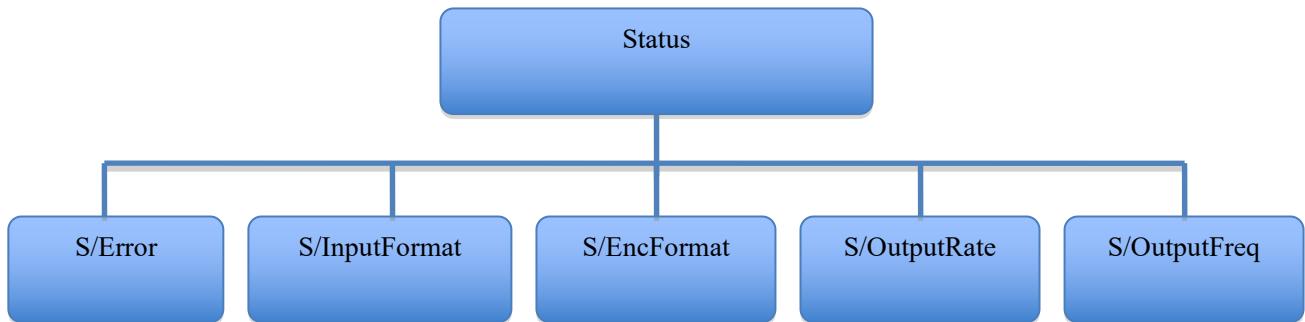

A 16x2 character LCD Display and 6 keys consist of the User Interface of Menu. When power on, string “Please wait...” will be shown on the LCD display on the top of the device. The initialization is taken place and no operation on the menu is accepted. After the initialization completed, The string “**MainMenu**”, the top layer menu, is shown on the LCD. Press [ENTER] key to enter next layer of menu or to confirm the current parameter, Using [**↑**] [**↓**] [**←**] [**→**] keys to navigate the menu and to enter or modify the parameters. Press [EXIT] to go back to the previous menu or to discard the setting just entered. Whenever the settings are more than one item, different sub-menus will be provided for easy operation, just press [ENTER] to access them.

There are four first-layer sub-menus, the structure of the top and the first-layer menu is shown below, ,Press [ENTER] to get into the next layer menu.

5.1 Status

There are five first-layer sub-menus under Status menu, they are listed below. All are prefixed with **S/** stands for Status, their parental menu.

5.1.1 **S/Error**

Displays the error messages

5.1.2 **S/InputFormat**

Indicates the Video format detected, HDMI is prior to CVBS

5.1.3 **S/EncFormat**

Indicates the encoder format of video used

5.1.4 **S/OutputRate**

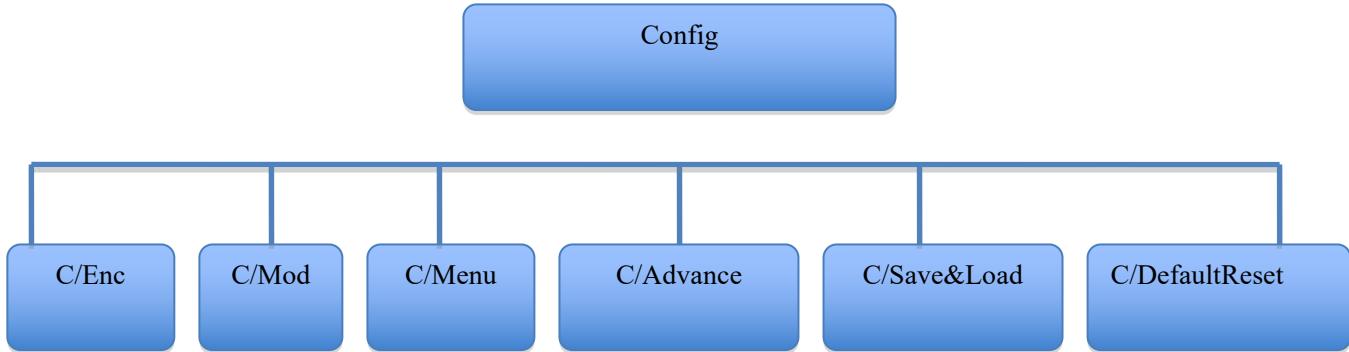

Indicates the data rate capacitance of the output RF, depends on RF parameters

5.1.5 **S/OutputFreq**

Indicates the central frequency of the RF output carrier

5. 2 Config

There are six first-layer sub-menus under Config menu, they are listed below. All are prefixed with **C/** stands for Config, their parental menu.

5. 2. 1 C/Enc

Second-layer menu for Encoder settings. There are three third-layer sub-menus under Config/Encoder menu, they are listed below. All are prefixed with **C/E/** stands for Config/Encoder/, their parental menu.

These third-layer sub-menus include, **C/E/InputSelect**, **C/E/EncFormat** and **C/E/EncVolume** for Video/Audio source selection, Encoder Video Resolution setting and Encoder volume adjusting, respectively.

Use [**↑**] [**↓**] to roll the sub-menu under **C/E/** and press [ENTER] to enter the one selected.

C/E/InputSelect, Use [**↑**] [**↓**] to switch the input signal selection among *CVBS*, *HDMI* and *Auto*. The default setting is *Auto*, it will detect and accept HDMI signal first, if not exist, then CVBS. Press [ENTER] to confirm or [EXIT] to discard.

C/E/EncFormat, Use [**↑**] [**↓**] to switch the Encoder Video Resolution among *1080i/29.97Hz*, *1080i/25Hz*, *720p/59.94Hz*, *720p/50Hz*, *480i/29.97Hz*, *576i/25Hz* and *Auto*. When *Auto* is set, the encoder format is similar to the video format detected at the input, HDMI is always prior to CVBS. Press [ENTER] to confirm or [EXIT] to discard.

C/E/EncVolume, Use [**↑**] [**↓**] to modify the Audio Volume of Encoder. The range of valid value is from *-15dB* to *+15dB*. The default value is *0dB*, that is no amplification nor attenuation of audio volume at all. Press [ENTER] to confirm or [EXIT] to discard.

Note: proper value should be carefully considered to avoid audio distortion and saturation.

5. 2. 2 C/Mod

Second-layer menu for Modulator settings. There are three third-layer sub-menus under Config/Modulation/ menu, they are listed below. All are prefixed with **C/M/** stands for Config/Modulation/, their parental menu.

These third-layer sub menu are **C/M/OutputFreq**, **C/M/OutputLevel** and **C/M/Bandwidth**, for Output Frequency Setting, Output RF Level Setting and Modulation Bandwidth Setting, respectively.

Use [**↑**] [**↓**] to roll the sub-menu under **C/M/** and press [ENTER] to enter the one selected.

C/M/OutputFreq: Use [**↑**] [**↓**] to modify the central frequency of Modulator. The range of valid value is from *100MHz* to *862MHz*. The default value is *303MHz*, Press [ENTER] to confirm or [EXIT] to discard.

C/M/OutputLevel: Use [**↑**] [**↓**] to modify the RF Output Level of Modulator. The range of valid value is from *82dBuV* to *100dBuV*. The default value is *100dBuV*, Press [ENTER] to confirm or [EXIT] to discard.

C/M/Bandwidth: Use [**↑**] [**↓**] to modify the RF Bandwidth of Modulator. The valid value are *6MHz*, *7MHz* and *8MHz* The default value is *6MHz*, Press [ENTER] to confirm or [EXIT] to discard.

5. 2. 3 C/Menu

Second-layer menu for Menu settings. There are two third-layer sub-menus under Config/Menu/ menu, they are listed below. All are prefixed with **C/Mn/** stands for Config/Menu, their parental menu.

These third-layer sub menu are **C/Mn/PwrSave** and **C/Mn/KeyLock**, for Power Saving Settings and Key Locking Setting, respectively.

Use [**↑**] [**↓**] to roll the sub-menu under **C/Mn/** and press [ENTER] to enter the one selected.

C/Mn/PwrSave: Use [**↑**] [**↓**] to toggle the Power Saving Mode, *On* or *Off*. Press [ENTER] to confirm or [EXIT] to discard. The default value is *On*, and the LCD will be off automatically if 60 seconds idle of keys, To leave the Power Saving Mode, just press any one of the keys. All internal functions will not be affected whether this mode is enabled or not.

C/Mn/KeyLock: Use [**↑**] [**↓**] to toggle the Key Locking function, *On* or *Off*. [ENTER] to confirm or [EXIT] to discard. The default value is *Off*, When set to On, a set of 4 digits password is requested to enter. Following a valid password is received, user is prompted to reconfirm the same password. This password will be stored and activated once reconfirmation is correctly done. Otherwise, KeyLock will be set to *Off* automatically, and message “**Invalid Param**” will be shown for few seconds. When KeyLock is enable, the Keys on the top will be locked if 5 seconds idle is detected. To resume the Keys function, simply press any one of them, then follow the password recognition menu prompt.

Importance note: There is no way to retrieve the password except factory work, please keep your password record carefully for retrieving the KeyLock.

5. 2. 4 C/Advance

Second-layer menu for Advance settings. There are 17 third-layer sub-menus under Config/Advance/ menu, they are listed below. All are prefixed with C/A/ stands for Config/Advance, their parental menu.

C/A/Enable, C/A/ServiceID, C/A/ServiceName, C/A/ProviderID, C/A/ONID, C/A/TS ID, C/A/VideoPID, C/A/AudioPID, C/A/PCR PID, C/A/LCN, C/A/GuardIntervl, C/A/Constellatio, C/A/TMS, C/A/CodeRate, C/A/EncMode, C/A/EncRate and C/A/RF On.

Use [↑] [↓] to roll the sub-menu under C/A/ and press [ENTER] to enter the one selected.

When **C/A/Enable** is set to Disable, all other 16 third-layer sub-menus under C/A/ will be hidden for easy operation. Default value is Disable.

The entry method and operation are similar to those of other sub-menu. The following table shows the functions, default values and the valid values of these sub-menus.

Table 2.

3rd Layer menu	Description	Default	Valid values
C/A/Enable	Enable the visibility of the other advance setting sub-menus	<i>no</i>	<i>on, off</i>
C/A/ServiceID	Service ID number	<i>101</i> (decimal, same below)	<i>1 to 65535</i>
C/A/ServiceName	Service Name	<i>Service 101</i>	<i>16 characters Max.</i>
C/A/ProviderID	Provider ID	<i>EM101</i>	<i>16 characters Max.</i>
C/A/ONID	Original Network ID	<i>10</i>	<i>0 to 65535</i>
C/A/TS ID	Transportation Stream ID	<i>101</i>	<i>0 to 65535</i>
C/A/VideoPID	Video Packet ID	<i>1011</i>	<i>32 to 8190</i>
C/A/AudioPID	Audio Packet ID	<i>1013</i>	<i>32 to 8190</i>
C/A/PCR PID	PCR Packet ID	<i>1015</i>	<i>32 to 8190</i>
C/A/LCN	Logical Channel Number	<i>101</i>	<i>1 to 16383</i>
C/A/GuardIntervl	Guard Interval	<i>1/8</i>	<i>1/4, 1/8, 1/16, 1/32</i>
C/A/Constellatio	Constellation	<i>16QAM</i>	<i>QPSK, 16QAM, 64QAM</i>
C/A/TMS		<i>8K FFT</i>	<i>2K FFT, 8K FFT</i>
C/A/CodeRate	FEC Code Rate	<i>5/6</i>	<i>1/2, 2/3, 3/4, 5/6, 7/8</i>
C/A/EncMode	Encoder Mode for Video	<i>H.264</i>	<i>MPEG2 SD, H.264</i>
C/A/EncRate	Encoder Bit Rate for Video	<i>SD=2Mb/s, HD=6Mb/s</i>	<i>SD: 0.5 to 6Mb/s HD: 1.5 to 11 Mb/s</i>
C/A/RF On	RF Output On/Off	<i>on</i>	<i>on, off for standby mode</i>

5. 2. 5 C/Save&Load

Second-layer menu for Save_&_Load settings. There are 4 third-layer sub-menus under Config/Save&Load/ menu, they are listed below. All are prefixed with C/S&L/ stands for Config/Save&Load, their parental menu.

These third-layer sub menu are

C/S&L/Save, for Saving all settings to one of 64 internal registers (1 to 64),
C/S&L/Load, for Loading all settings from one of 64 internal registers (1 to 64),

C/S&L/PresetNTSC, for Preset all registers with NTSC-like settings (6MHz channel spacing), and

C/PresetPAL, for Preset all registers with PAL-like settings (8MHz channel spacing).

Use [**↑**] [**↓**] to roll the sub-menu under C/S&L/ and press [ENTER] to enter the one selected.

C/S&L/Save, Use [**↑**] [**↓**] to modify the register number. The range of valid value is from 1 to 64. Press [ENTER] to confirm or [EXIT] to discard. All current settings will be saved to the register selected.

Note: The KeyLock setting (*On* or *Off*) will not be stored in the internal registers when apply the Save_&_Load.

C/S&L/Load, Use [**↑**] [**↓**] to modify the register number. The range of valid value is from 1 to 64. Press [ENTER] to confirm or [EXIT] to discard. All current settings will be loaded from the register selected.

Note: The KeyLock setting (*On* or *Off*) will not be modified by calling the Save_&_Load function.

C/S&L/PresetNTSC, Press [ENTER] to confirm. All contents in all 64 registers will be cleared and be preset with settings (NTSC-like, 6MHz channel spacing) list below.

Note: The KeyLock setting (*On* or *Off*) will not be modified by this operation.

C/S&L/PresetPAL, Press [ENTER] to confirm. All contents in all 64 registers will be cleared and be preset with settings (PAL-like, 8MHz channel spacing) list below.

Note: The KeyLock setting (*On* or *Off*) will not be modified by this operation.

Table 3.

Contents of <i>i</i> th (<i>i</i> =1 to 64) Registers after C/Save&LoadPreset done	
C/E/InputSelect	<i>Auto</i>
C/E/EncFormat	<i>Auto</i>
C/E/EncVolume	<i>0 dB</i>
C/M/OutputFreq	$467+i^*6$ (MHz) (ch 14, PresetNTSC) $466+i^*8$ (MHz) (ch 21, PresetPAL)
C/M/OutputLevel	<i>100dBuV</i>
C/M/Bandwidth	<i>6MHz</i> (for both NTSC & PAL systems)
C/Mn/PwrSave	<i>on</i>
C/Mn/KeyLock	<i>off</i>
C/A/Enable	<i>no</i>
C/A/ServiceID	<i>m ; (m=100+i)</i> (decimal, same as below)
C/A/ServiceName	<i>Service n ; (n=100+i)</i>
C/A/ProviderID	<i>EM101</i>
C/A/ONID	<i>10</i>
C/A/TS ID	<i>100+i</i>
C/A/VideoPID	<i>p ; (p=1001+i^*10)</i>
C/A/AudioPID	<i>q ; (q=1003+i^*10)</i>
C/A/PCR PID	<i>r ; (r=1005+i^*10)</i>
C/A/LCN	<i>s ; (s=100+i)</i>
C/A/GuardInterval	<i>1/8</i>
C/A/Constellation	<i>16QAM</i>
C/A/TMS	<i>8K FFT</i>
C/A/CodeRate	<i>5/6</i>
C/A/EncMode	<i>H.264</i>
C/A/EncRate	<i>SD=2Mb/s, HD=6Mb/s</i>
C/A/RF On	<i>on</i>

5.2.6 C/DefaultReset

Second-layer menu for factory default settings.

C/DefaultReset: Press [ENTER] to retrieve all settings from the factory default values, or press [EXIT] to discard. All settings after **C/DefaultReset** done, please refer to Table 2 above.

Note: All contents of Save_&_Load registers and the setting of KeyLock (*On* or *Off*) remain unchanged after calling DefaultReset.

5.3 QuickSetup

First-layer menu for Quick Setup. There are three second-layer menus under it. They are,

Q/PAL ch, **Q/NTSC-Cable** and **Q/NTSC-Air** for Quick Setup for PAL-like, NTSC-Cable-like and NTSC-Air-like systems.

These menu allows user to do a very quick operation of all settings of this device except the Power_Saving setting (*On* or *Off*) and KeyLock setting (*On* or *Off*). Only the traditional channel number is requested to enter, then all other settings are generated internally and automatically. Settings collision prevention is taken place with different channel number, that means, user is not requested to set and check the advanced level settings such as Video PID, TS_ID, Service name, LCN, etc. All these settings will be uniquely generated

Encoder & Modulator Series

according to the particular channel number set on the QuickSetup menu. These unique settings are essential for most of STB or DTV, especially many devices are combined to form a multi-service system.

Use [**↑**] [**↓**] to roll the sub-menu under **Q/** menu and press [**ENTER**] to enter the one selected.

Q/PAL ch, Use [**↑**] [**↓**] to enter a valid PAL channel number, such as *E21, S12, 47*, etc. Press [**Enter**] to confirm or [**EXIT**] to discard.

Q/NTSC-Cable, Use [**↑**] [**↓**] to enter a valid NTSC-Cable channel number. Valid channel number range is from *007* to *135*, but do not include *095* nor *096* (<100MHz). Press [**ENTER**] to confirm or [**EXIT**] to discard.

Q/NTSC-Air, Use [**↑**] [**↓**] to enter a valid NTSC-Air channel number. Valid channel number range is from *007* to *078*. Press [**ENTER**] to confirm or [**EXIT**] to discard.

Note: Please enter the most significant digit(s) as “*0*” if not in use, for examples *034, 008*.

Note: The KeyLock setting (*On* or *Off*) will not be modified by this operation.

5.4 Software Ver

First-layer menu for Software Version indication.

Press [**ENTER**] to show the Software Version, press [**EXIT**] to go back to the top menu.

6. Accessories

AC/DC power adapter	1pc
HDMI cable	1pc
Analog A/V cable	1pc
User's Manual (CD-Rom)	1pc
Quality Assurance & Maintenance card	1pc

台灣無線電視頻道 / 地區分佈表

地區別	電視台 號碼	台視	中視	華視	錄放 影機 VTR	華視 教育 台
北部地區		7	9	11	13	UHF35

中部地區	12	10	8	13	UHF36
南部地區	7	9	11		UHF34
花蓮地區	7	9	11		UHF35
蘭陽台東地區	10	12	8	13	UHF33
澎湖地區	UHF39	UHF41	UHF37		UHF34
基隆地區	UHF48	UHF44	UHF46	13	UHF35
新竹地區	UHF48	UHF44	UHF46	13	330R35
南投地區	UHF48	UHF44	UHF46	13	UHF36

註 1. 強場區，可以 VHF/HI 之八木天線接收，並以變頻處理 器，將接收信號改變，如 7，
9， 11 改為 8， 10， 12， 以避免同頻干擾，原接收頻道應避免播放。

註 2. 接收困難區應以較佳指向性之單頻天線接收，並加前置濾波及放大 處理。

註 3. 接收 UHF 轉播站之信號，應將之變頻至 CATV 頻段。

註 4. 教育台也應變頻至 CATV 頻段。

無線電視頻道頻率表

頻道	頻寬 (MHZ)	視頻	色訊	音頻
VHF 低頻段
