

Release Date : 2012/09/21

Hardware Version

Main Board	1500P	Tuner Board	DVB-S2/C/T/T2
-------------------	-------	--------------------	---------------

Software Version

Main Software Version	15PR0019	ARM Version	9F
FPGA Version	22	Decoder Version	8A
LINUX Version	47	TS/IP Input NIOS	95
TS/IP Output NIOS	58	TS/IP Input FPGA	92
TS/IP Output FPGA	16	WEB Version	1906

Improvement

- 1) The DVB subtitle on screen display is available to set the Horizontal and vertical position, and the font size
- 2) Fixed the problem that the decoder will be crash when the DVB-T tuner runs more than 10 hours with very
- 3) The CI is available to descramble only Video and Audio PIDs.
- 4) The ITU-35 Closed Caption can be embedded over SDI.
- 5) Fixed the problem that the SDI embedded audio has noise, and the level is too low.
- 6) Improved the WEB GUI.

Limitation

Remarks

※Please follow the file named DCH5000P&5100P&1500P of PBI Digital Headend Product Upgrade Procedure V2.0.pdf to update the software.
