

# SNR S5110 series

L2+ Managed Ethernet switches

The SNR S5110 series switches are the most affordable solution in their class with 10GbE SFP+ Uplink ports.

The port capacity and functionality of the series provides the ability to build a gigabit access level in corporate networks and in the networks of telecom operators.

## Main features:

- 1/10GbE SFP+ Uplink ports
- Wide range of security features
- Non-blocking switching matrix
- Simple configuration via SNR CLI
- Built-in surge protection on all copper ports
- Static routing

## Switch models

Models	10/100/1000Base-T	Combo ports 10/100/1000Base-T  100/1000Base-X SFP	100/1000Base-X SFP	1/10GbE SFP+
SNR-S5110G-24TX(-POE)	24	-	-	4
SNR-S5110G-48TX(-POE)	48	-	-	6

## High performance

The S5110 series switches are built with modern chipsets and have a non-blocking switching matrix that allows all switch ports to operate simultaneously at full speed. It also guarantees high performance and minimal network latency.

Model	Switching Capacity	Forwarding Rate	MAC
SNR-S5110G-24TX(-POE)	128 Gbps	95,2 Mpps	16K
SNR-S5110X-48TX(-POE)	216 Gbps	160,7 Mpps	32K

## Resilience

For organizing resilient networks, support for standard protocols STP/RSTP/MSTP.

Link aggregation functionality using LACP or static aggregation allows combining up to 8 ports into one logical interface, increasing the bandwidth ability and resilience at the data link level.

Due to equipping each RJ-45 port with surge protection, the switch components are protected from damage when high voltage applied to the port.

## PoE+ support

The S5110 series SNR switches support PoE 802.3af и PoE+ 802.3at standards with a smart capacity management. The PoE technology reduces cost of ownership and makes network maintenance easier. It allows to supply with power directly from switch different types of equipment such as WiFi hotspots, IP/Video phones, thin clients and others.

Model	Number of PoE ports	Total PoE capacity
SNR-S5110G-24TX-POE	24	370 Watt
SNR-S5110G-48TX-POE	48	370 Watt

## Quality of Service (QoS)

Support for 8 hardware queues per port allows creating flexible service policies for different types of traffic, thus ensuring high quality of sensitive services under high load conditions. Traffic can be classified by field values in L2-L4 headers, including CoS, DSCP, VLAN ID, IP/MAC addresses, and TCP/UDP ports.

Model	Multicast group	Queues per Port	ACL
SNR-S5110G-24TX(-POE)	1024	8	1536
SNR-S5110G-48TX(-POE)	4096	8	1536

## Security

The S5110 series switches provide a wide range of security features for both service providers and enterprise networks. Hardware Access Control Lists (ACLs) can filter traffic by L2-L4 header fields without performance brake.

## Operational convenience

The S5110 series SNR switches have a convenient and intuitive CLI. The system supports all the necessary functionality of the Enterprise/ISP level for building modern data networks and has extensive management and monitoring capabilities via CLI and SNMP.

## Dimensions and power supply

The switches are powered by a built-in AC power supply. current 100-240V AC

Model	Dimension	Weight (Brutto)	Power Consumption	Cooling	Power Supply
