1 Welcome

Thank you for purchasing SNR VP-80 Multimedia VoIP Phone. The SNR VP-80 is an innovative smart desk phone loaded with tremendous value for business communications as well as unprecedented power for advanced custom business applications development and personalization. Featuring Android 4.2 system, a 7 inch capacitive touch screen TFT LCD, a 2M CMOS sensor camera, Bluetooth, integrated PoE and Wireless, SNR VP-80 provides excellent user experiences such as high quality video phone, smooth internet surfing, various 3rd party applications and daily information. Built with advanced security protection for privacy, this Multimedia VoIP Phone also features broad interoperability with most 3rd party SIP based devices, IPPBX and major IMS platforms. The SNR VP-80 represents the future multimedia terminal in modern Internet age.

This user manual is designed to help you understand how to configure and manage the SNR VP-80 Multimedia VoIP Phone. Besides demonstrating how to install this unit with ease, this manual will explain how to fully utilize the phone's voice calling features as well as explore all the built-in feature-rich applications.

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with

minimum distance 20cm between the radiator& your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ✓ Reorient or relocate the receiving antenna.
 - ✓ Increase the separation between the equipment and receiver.
 - ✓ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-

2 Product Overview

2.1 Instruction

SNR VP-80 is an Android-based multimedia terminal with a 7 inch touch screen and a 2M CMOS sensor camera. It supports H.264/H.263 codec with adaptive bandwidth adjustment. The 7 inch touch screen offers excellent user experiences such as high quality videophone, smooth internet surfing, various Android Apps and daily information.

SNR VP-80 provides 2 Ethernet ports, 1USB, 1HDMI, and one 3.5mm headset/audio port.

2.2 Technical Specification

| Model | SNR VP-80 |
|---------------------|--|
| Graphic Display | <ul style="list-style-type: none"> ● 7 inch capacitive touch screen TFT LCD, 1024x600 pixels, 16:9 wide screen aspect ratio |
| Camera | <ul style="list-style-type: none"> ● 2 mega pixels CMOS camera, free rotation |
| Network Protocol | <ul style="list-style-type: none"> ● SIP RFC3261,TCP/UDP/IP,PPPOE,RTP/RTCP |
| Operation System | <ul style="list-style-type: none"> ● Android 4.2 |
| Voice Codec | <ul style="list-style-type: none"> ● G.711A/U, G.723, G.729a/b, G.722, iLBC, ● AMR-NB, AMR-WB, OPUS |

2.3 Equipment Appearance And Interface Description

Figure 1-1 SNR VP-80 Front View

Figure 1-2 SNR VP-80 Rear View

Figure 1-3 SNR VP-80 Profile View

2.3.1 Interface Description

| Interface | Description |
|---------------|--|
| Camera | Adjustable camera shooting angle, rotate down the camera to "off" angle. |
| USB interface | External USB storage device |
| Headset | Connect to 3.5mm stereo headphone, headset device |
| HDMI | Use HDMI cable to output the video to a TV screen |
| LAN | Network interface can be connected to a hub, switch or other network access devices. It also supports POE(Power over Ethernet) . |
| PC | Share the network access from LAN port, and for PC and other equipment connection |
| Power | Connect to 12V adapter, Power supply |
| Handset | Connect to handset |
| Lock | Lock the video phone with a Laptop lock |

Note: If Power over Ethernet is being used, do not plug in the AC adapter.

2.3.2 Keypad Description

| Interface | Description |
|-----------|--|
| Power | Turn on/off the LCD, Reboot, Silent mode |
| Suspend | Turn on/off the LCD, Reboot, Silent mode |

| | | |
|-----------------|---|---|
| Volume | Press + or – for the phone volume adjustment | |
| Standard Keypad | Input the number or symbol | |
| Function Key | Delete | Delete a character before the cursor |
| | OK | Same function with soft keyboard "Enter" key |
| | Message | Optional |
| | Contact | Enter Into the contacts list, you can view the local contact |
| | Conference | The first party is held in the case, according to a conference key, the first party can be combined to achieve a tripartite meeting |
| | Hold | To hold a call during the call |
| | Transfer | To transfer the current call to the third party |
| | Mute | The other party cannot heard the voice during the call |
| Home |  | Return to the main screen, and long press, it will display recently used applications |
| Menu |  | To call up the System or program setup menu |
| Back |  | Return to the previous menu |
| Speaker |  | Speaker |

2.4 Indicators

| Indicator Name | Icon | Status | Description |
|--------------------|---|----------|---------------------------------------|
| Power |  | ON | System is under working |
| | | OFF | System is not working |
| Network Connection |  | ON | Network (LAN Port) is connected |
| | | OFF | Network (LAN Port) is disconnected |
| Information |  | Flashing | Contains Miss Calls or Unread Message |
| | | OFF | Normal status |

3 Installation

3.1 Equipment Packaging

| Name | Quantity |
|-------------------|----------|
| Main Case | 1 |
| Handset | 1 |
| Phone Cord | 1 |
| Power Adapter | 1 |
| Ethernet Cable | 1 |
| Quick Start Guide | 1 |

3.2 Connecting Video Phone

- Connection diagram

- **Connecting to Network**

Use the matched network cable to connect the LAN Port of the video phone to the Router or Switch. Viewing the top right corner of the screen, if the indicator light  is on, network cable is connected properly.

- **Connecting to PC**

Use the matched network cable to connect the PC Port of the video phone. The PC can access to the internet network via PC Port of the video phone.

3.3 Installation Considerations

This product is a desktop product, and here are some safety recommendations about the installation and the usage:

- Do not use this product near water, such as: bath, washbasin, kitchen sink and other damp places and so on;
- Place the device in a place away from heat;
- Place the device away from traffic areas to prevent collisions;
- Please use the equipment with the matching power adapter or POE;

4 Getting Started

4.1 Basic Operation

4.1.1 Main Screen Instruction

- Status bar, at the top of the screen, displaying the status of system information.
- Do Not Disturb plug-in, When enabled DND, prohibit incoming calls in; Incoming call will be normal when DND is closed.
- Accounts, SNR VP-80 supports 6 lines. Accounts list will show the status of the current account.
- Extended Screen Prompt, Display the location of current screen page; and show how many pages extended.
- Shortcuts, at the bottom of the screen, user can drag a shortcut to this region to achieve the replacement of the shortcut. Supports max four shortcuts.

4.1.2 Status And Notifications Instruction

The status bar in main screen is divided into two zones, notification area and status area, as shown below:

Status Area

| Icon | Description |
|---|--------------------------|
|  | Network is connected |
|  | Network is not connected |
|  | Mute mode |
|  | Alarm clock is set |
|  | PPPOE is connected |
|  | PPPOE is failed |

Notification Area

| Icon | Description |
|---|---|
|  | SIP account is registered |
|  | Missed call, number means how many missed calls |
|  | downloading |
|  | uploading |
|  | Receives a new email |
|  | An event is coming |

4.1.3 Using The Touchscreen

- **Tap**

To select items on the screen (e.g., setting options, apps); to press onscreen buttons; to type letters and symbols using the onscreen keyboard.

- **Touch and Hold**

Touch the item on the screen and hold it without lifting your finger from the screen till an action occurs.

For example, touch and hold on a picture to bring up operation options.

- **Drag**

Touch and hold an item for a few seconds first. Once the item has a red frame activated, or a move option shows up, keep your finger on the screen and move it until the target position is reached. Then lift your finger up to release.

- **Slide**

Move your finger fast across the screen to slide. To view different idle screens or menu pages, slide left or right; to view the status bar on top of the screen, place your finger on the bar and slide it down. If your finger stays on the screen for too long, the item may be selected and sliding won't occur.

- **Double-click**

Click on the screen twice in quick succession, for example, when user surfs in browser, you can quickly click twice on the page, the page can be enlarged.

- **Pinch**

Place two fingers on the screen, then pinch them together (zoom out) or spread them apart (zoom in). This could be used in a picture.

4.1.4 Startup And Shutdown

- **Startup**

Connect to the power supply, the system automatically starts up.

- **Shutdown**

If you do not use the device, directly remove the power supply, to save electricity.

- **Reboot**

If you need to restart the device, according to the following steps:

- 1) Press and hold the "Power" button until the pop-up "Options" menu.
- 2) Click the "Reboot"

4.1.5 View / Turn Off Notifications

When viewing notifications, simply press and hold the status bar, drag down, as shown below:

To turn off notifications, simply hold the notice at the bottom of the screen and then drag up or press the "Back" on the hard keyboard. Click on the icon  to clear up the notice

4.2 Connecting To Network And Wi-Fi

SNR VP-80 supports a variety of network connections (Ethernet, Wireless) and device Network connections includes four modes, Static IP, DHCP, PPPOE, Wi-Fi access.

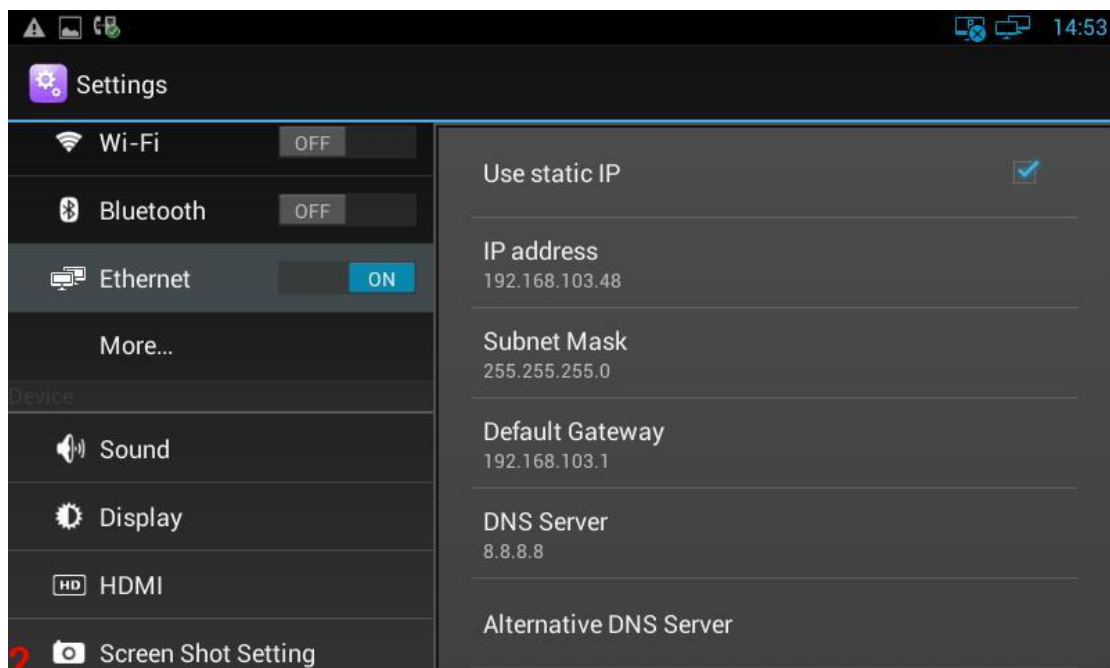

DHCP is the default configuration. Device connections include EHS headset, USB and Bluetooth device.

4.2.1 Configuring Static IP

You can select one of the following methods to enter the static IP configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet-> Using static IP.
- Mode 2: In the main screen, tap  -> Settings-> Wireless & Networks-> Ethernet -> Using static IP.
- Mode 3: Drag down the status bar, click shortcut icon  on the status bar ->SETTINGS->  ->Wireless & Networks-> Ethernet->Use static IP.
- Mode 4: In the main screen, tap  ->Network Settings->LAN Connecting->Static IP.

Configuration page is shown as below :

Configuration parameter specification :

| Parameter | Specification |
|------------|----------------------------------|
| IP address | set the IP address of the device |

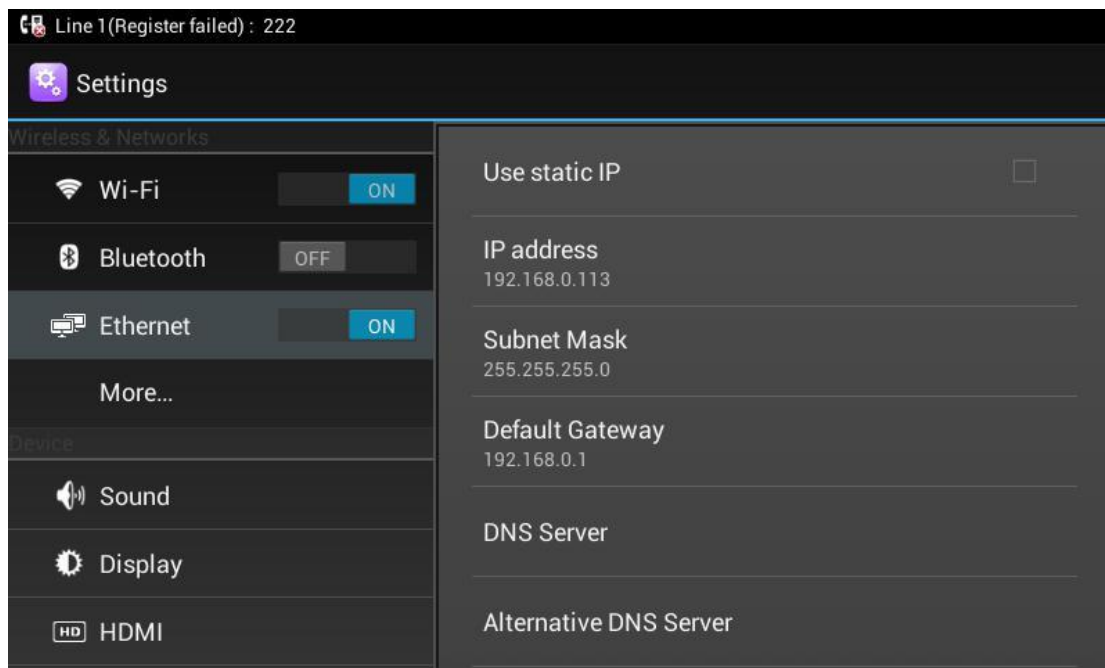

| | |
|------------------------|-----------------------------------|
| Subnet Mask | set the subnet mask of the device |
| Default Gateway | set the default gateway |
| DNS Server | set the DNS address |
| Alternative DNS Server | set the backup DNS address |

4.2.2 Configuring DHCP

You can select one of the following methods to enter the DHCP configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet-> uncheck Using static IP.
- Mode 2: In the main screen, tap  -> Settings-> Wireless & Networks-> Ethernet -> uncheck Using static IP.
- Mode 3: Drag down the status bar, click shortcut icon  on the status bar ->click SETTINGS icon  ->Wireless & Networks-> Ethernet-> uncheck Use static IP.
- Mode 4: In the main screen, tap  ->Network Settings->LAN Connecting->DHCP.

Configuration page is shown as below:

Note:

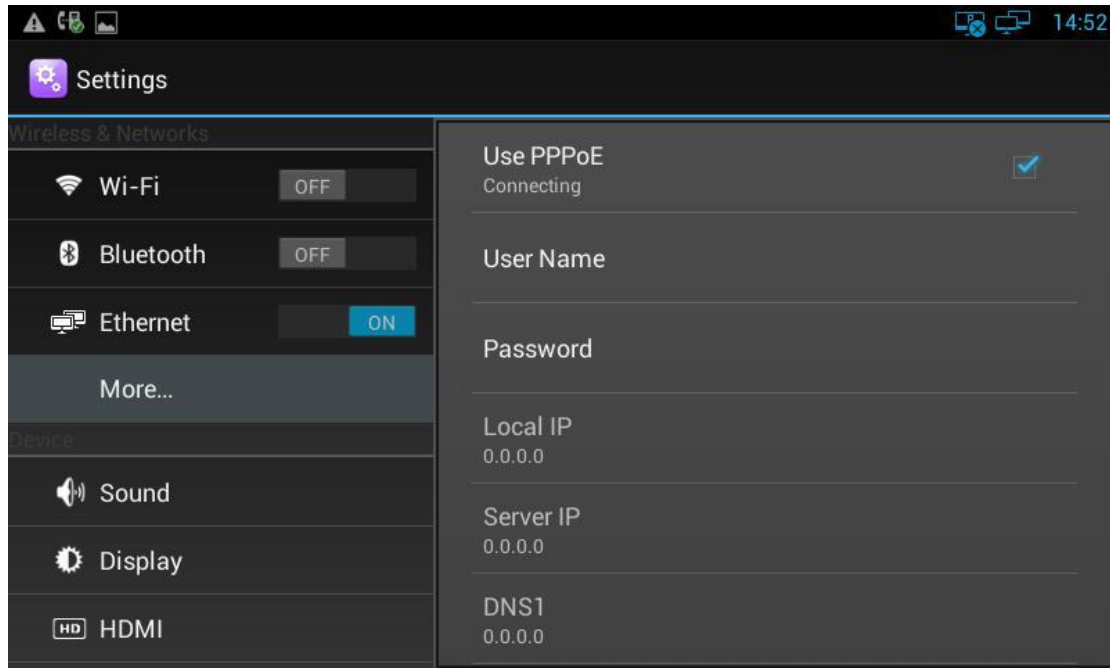

- 1) If DHCP acquired IP, it will display dynamic IP address information on the location of static IP configuration, cannot be modified, and there is a item of Use static DNS at the bottom the alternative DNS server, when checked, you can modify the primary DNS address and Secondary DNS address.
- 2) If DHCP is failed, the IP address will show as: 0.0.0.0.

4.2.3 Configuring PPPOE

You can select one of the following methods to enter the PPPOE configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks -> Ethernet ->More ->PPPOE.
- Mode 2: In the main screen, tap  -> Settings-> Wireless & Networks-> Ethernet -> More ->PPPOE.
- Mode 3: Drag down the status bar, click shortcut icon  on the status bar ->SETTINGS  ->Wireless & Networks-> Ethernet-> More ->PPPOE.
- Mode 4: In the main screen, tap  ->Network Settings->LAN Connecting->PPPOE

Configuration page is shown as below :

Parameter specification :

| Parameter | Specification |
|-----------|---|
| Use PPPOE | Check <input checked="" type="checkbox"/> is to enable PPPOE, otherwise, disable. |
| User Name | PPPOE account, provided by ISP |
| Password | PPPOE password, provided by ISP |

Proceed as follows:

- 1) Check Use PPPOE
- 2) Enter the correct user name and password of PPPOE

Note:

- 1) After dialing, can display the acquired IP address, server IP, the primary DNS, Secondary DNS information, status as connected
- 2) Not Dial, IP address information will be 0.0.0.0
- 3) There is a redial entry under Alternate DNS, click redial, then re-launch a PPPOE dial-up process, re-dial.

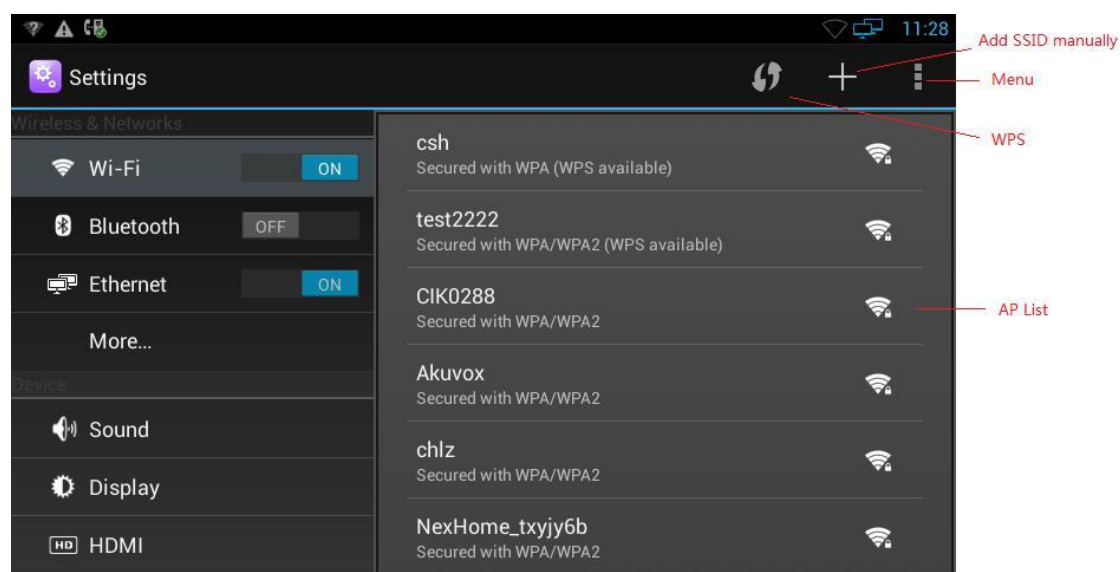

4.2.4 Configuring Wi-Fi

You can select one of the following methods to enter the Wi-Fi configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet->Wi-Fi.
- Mode 2: In the main screen, tap  -> Settings-> Wireless & Networks-> Ethernet-> Wi-Fi.
- Mode 3: Drag down the status bar, click shortcut icon  on the status bar

Configuration page is shown as below :

- 1) When the Wi-Fi switch is turned on, the video phone can list and display all Wi-Fi AP searched in the environment;
- 2) When connects to available AP in the environment, if a Wi-Fi AP is without password protection, there is no lock icon on Wi-Fi signal, it will automatically connect when clicked;
- 3) If a Wi-Fi AP is encryption, Wi-Fi signal will be added the lock icon, and when checked, it will pop up a dialog box to enter a password. If the password is incorrect,

the connection will not be successful, as shown below:

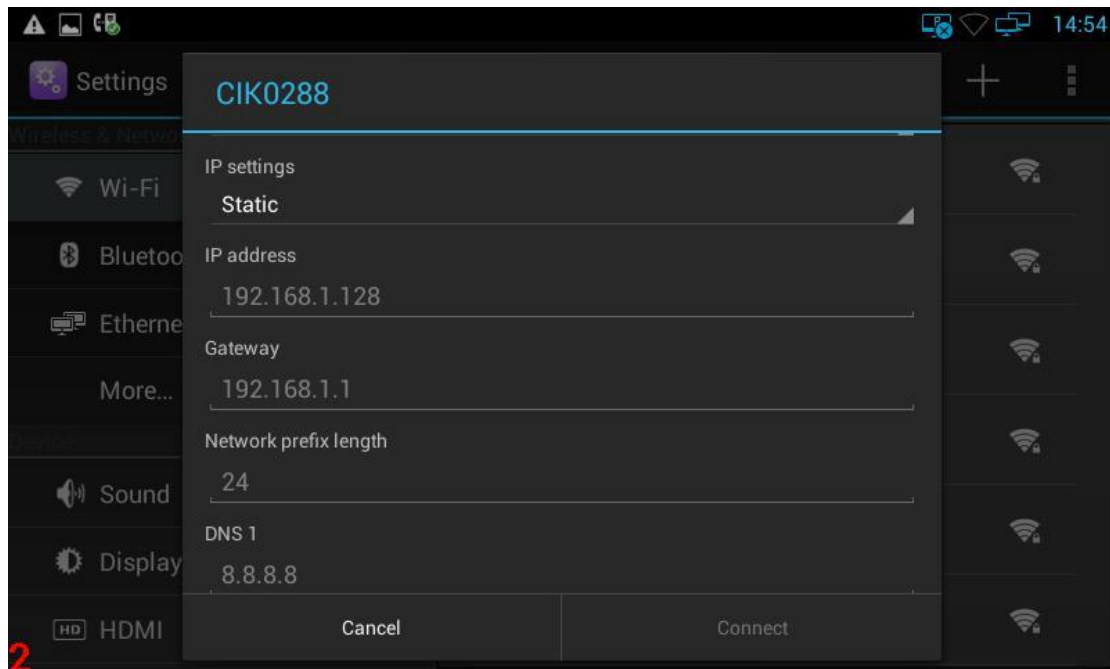

4) check Show advanced options, you can set Proxy server and IP mode.

- Proxy Settings

- IP settings(Static IP):

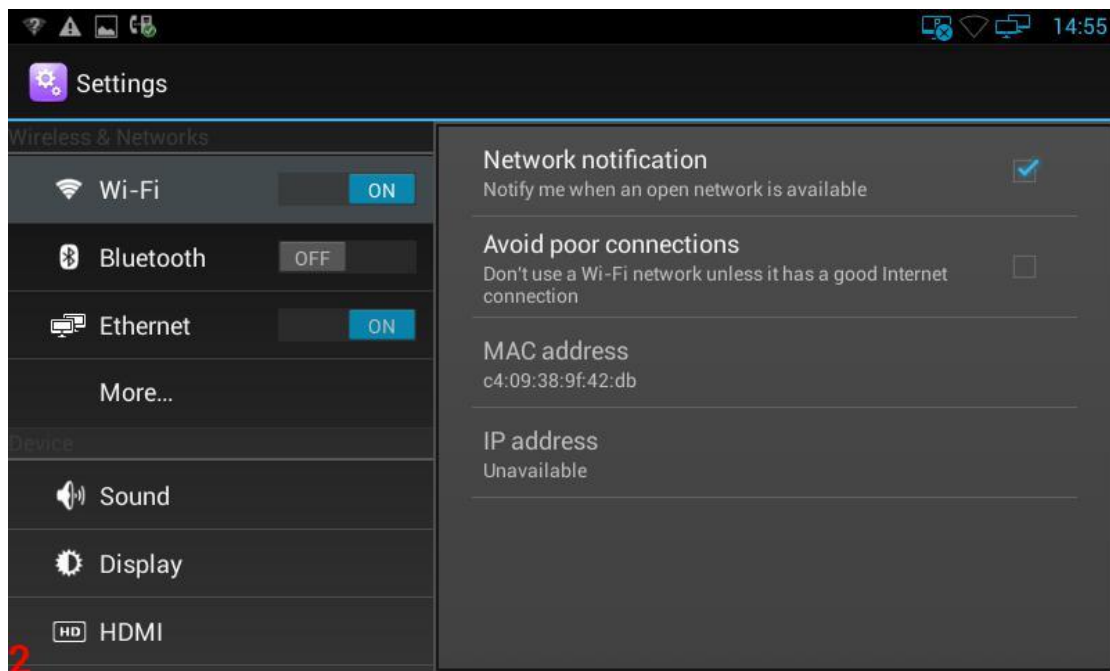

5) Long press on the connected Wi-Fi AP, it will pop-up a dialog box, you can forget the network or modify the network. Long press on the non-connected Wi-Fi AP, it will pop up a dialog box, and you can click and connect to network.

6) Click WPS(Wi-Fi Protected Setup) button, if the wireless router has WPS function, and the router WPS button is pressed, the video phone will be able to connect to the Wi-Fi without entering a password.

7) Press “+ ”symbol, you can add a SSID manually.

8) Click Menu, you can do the operations such as: Scan(scan the new wi-fi AP), WPS Pin Entry(enter the PIN on the Router, the phone will no need to input the wi-fi password), Wi-Fi Direct and Advanced.

9) In Advanced Menu, shown as below:

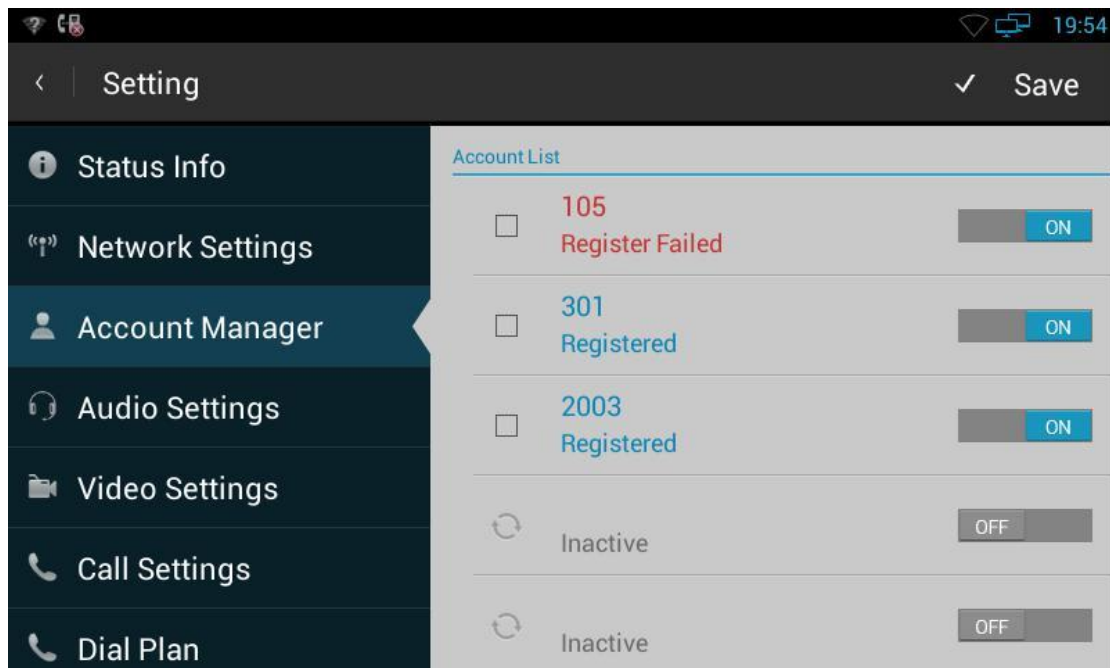

- a. Check Network notification, it will notify you when an open network is available;
- b. Check Avoid poor connections, it will prompt that don't use a WiFi network unless it has a good internet connection;
- c. View the Wi-Fi Mac address and IP address;

4.3 SIP Account Configuration

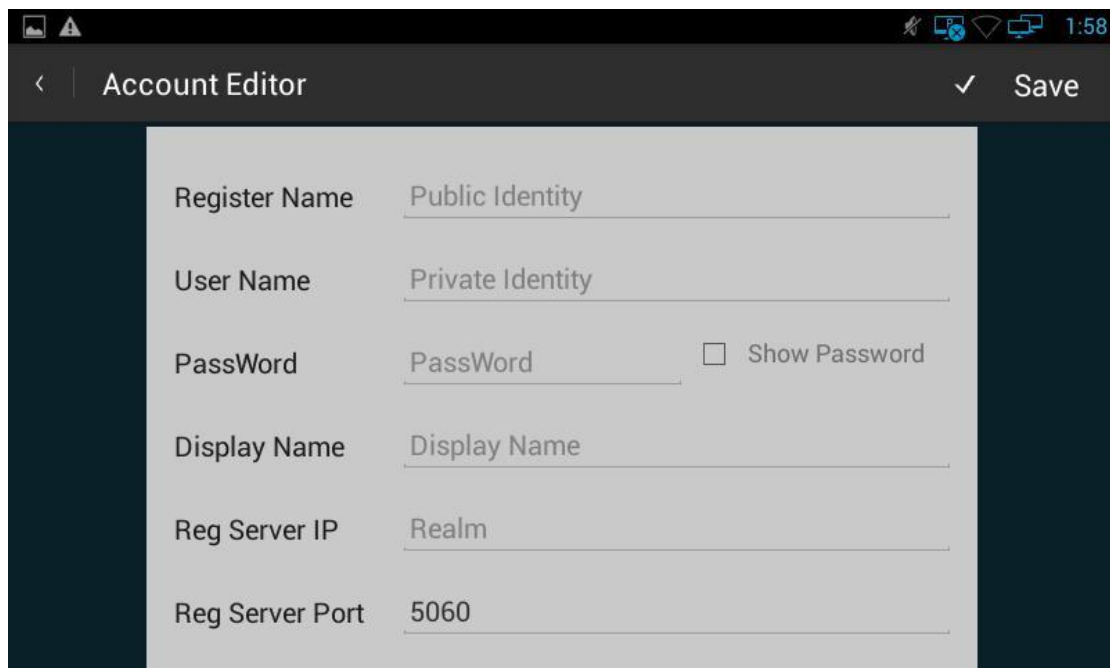

You can select one of the following methods to enter the SIP account configuration:

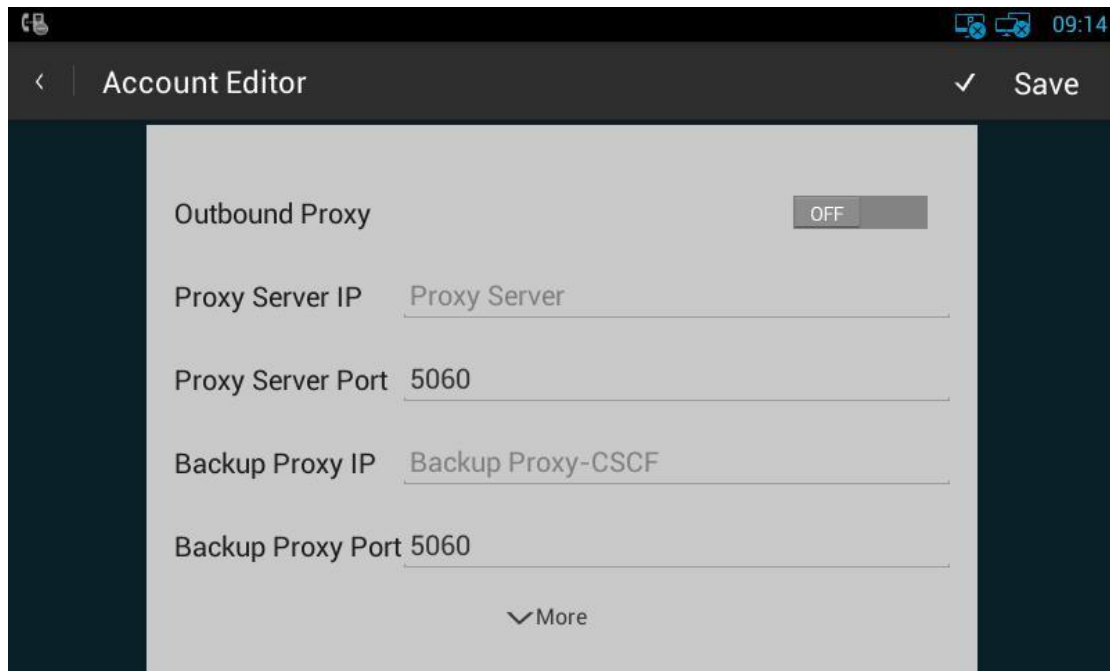

- Mode 1: In the main screen, click  -> then click .
- Mode 2: In the main screen, click  -> then Click  -> and then click .
- Mode 3: Directly pick up the handset or press Speaker -> then click .
- Mode 4: Click Browser, input IP address to enter login interface. Input username: admin, password is admin, click Login into web, then click Account-Basic;

4.3.1 Add Account

Click an account to enter Account Editor

Configuration parameters are described as follows:

| Parameter | Specification |
|--------------------------|---|
| Register Name | SIP Account ID provided by ISP |
| User Name | SIP User Name provided by ISP |
| Password | SIP Password provided by ISP |
| Display Name | SIP Display name |
| Reg Server IP | SIP Register Server, format: domain/IP, for example: 194.168.1.2 |
| Reg Server Port | The default port is 5060. |
| Proxy Server IP | SIP Proxy Server, format: domain/IP, for example: 194.168.1.2 |
| Proxy Server Port | The default port is 5060. |
| Backup Proxy IP | SIP Backup Proxy Server, format: domain/IP,for example: 194.168.1.2 |
| Backup Proxy Port | The default port is 5060. |

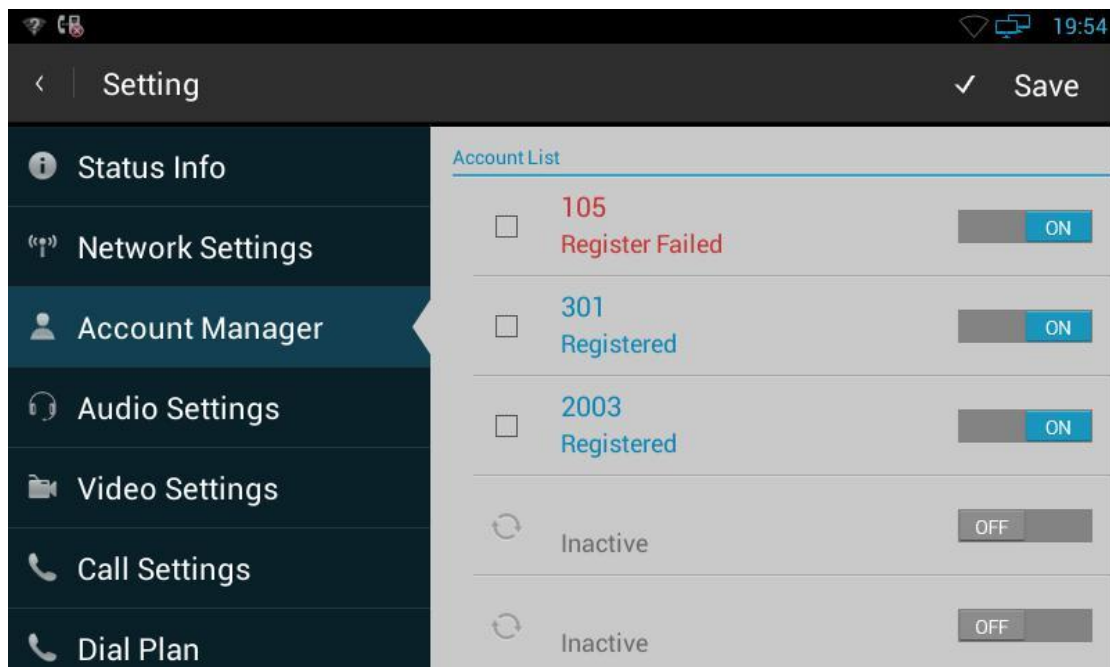

After all the parameters are configured, Click "save" button to save the configurations, then the sip account is added successfully. Then active the account.

4.3.2 SIP Account ON/OFF

After SIP account is configured and registered successfully, it will display the prompt "Registered" in the Account Manager, and the icon  will be displayed on the status bar.

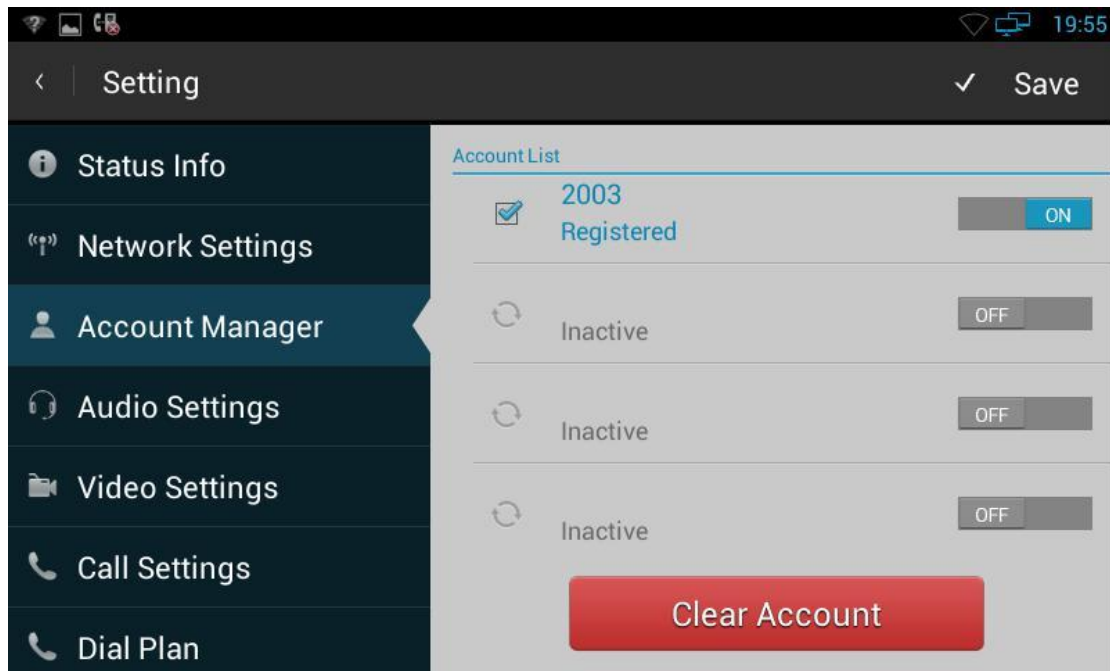

If you want to disable the account, please click .

If the sip account is failed to register, the failure code will be displayed under the account, and then you can check with the account configuration or network connection. As shown below:

4.3.3 Modify/Remove SIP Account

- 1) Modify the sip account: Directly click the account to modify;
- 2) Remove the sip account: Click the box of the account which you want to delete, and then press "Clear Account".

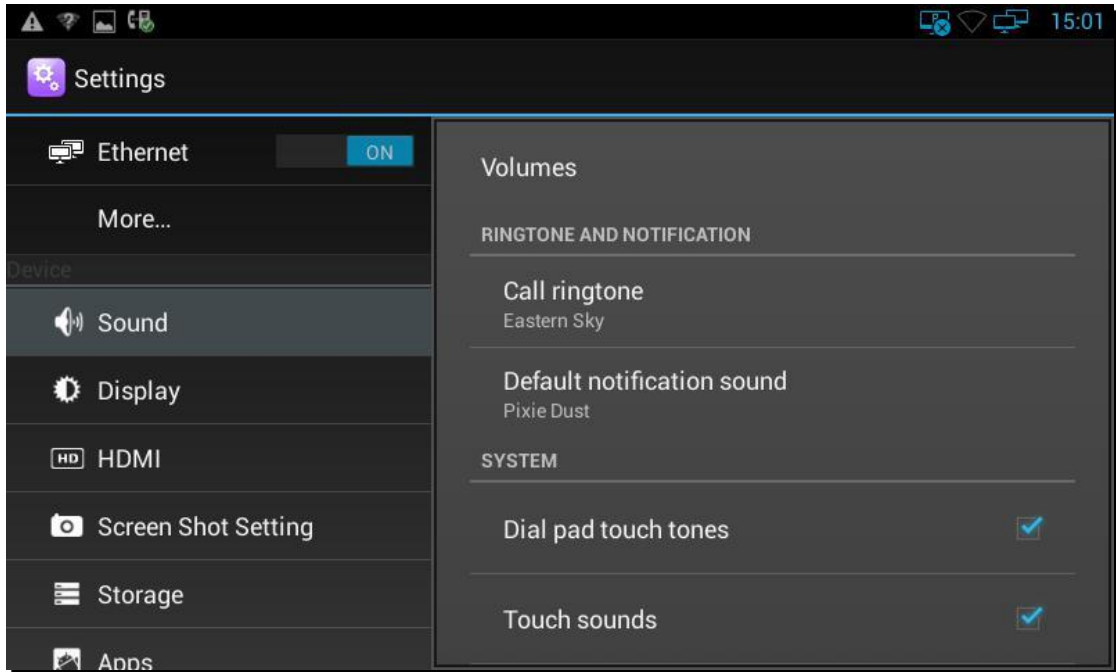

4.4 Sound

You can select one of the following methods to enter the Sound configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Sound.
- Mode 2: In the main screen, click  -> Settings -> Sound.

Click the icon on the upper left corner, and you can view photos and videos in groups in the drop-down list. Click on the folder to view all the photos.

While viewing photos, you can use two fingers to press on the screen, shrinkage or expansion to shrink or enlarge the image.

5.16 Bluetooth

Bluetooth is a proprietary, open wireless technology standard for exchanging data over short distances from fixed and mobile devices, creating personal area networks with high levels of security. On SNR VP-80, users could use Bluetooth to transfer files, share contact information with other Bluetooth portable devices by installing Bluetooth Application, or use Bluetooth headset for making calls.

To connect to a Bluetooth device, turn on SNR VP-80's Bluetooth radio first. The first time when using a new Bluetooth device with the SNR VP-80, "pair" the device with

SNR VP-80 so that both devices know how to connect securely to each other. After that, users could simply connect to a paired device. Turn off Bluetooth if it's not used.

Bluetooth related settings are under SNR VP-80's Settings application → Wireless & networks. Users could access it via the following two ways:

- In the main Screen, press  button -> System Settings -> Wireless & Networks;
- Press on screen  and click on  -> Wireless & Networks.

5.16.1 Turning Bluetooth On /Off

- Go to SNR VP-80's Settings;
- Click on Wireless & Networks;
- Click or untick the option for Bluetooth.

5.16.2 Changing Bluetooth Device Name

The SNR VP-80 uses "SVP3300" as Bluetooth device name by default. The device name will be visible to other devices when connecting them. Follow the steps below to change the name:

- Go to SNR VP-80's Settings;
- Click on Wireless & Networks;
- Click on Bluetooth, and click Bluetooth to turn it on;
- Click on Bluetooth settings → Rename, and enter a new name. Once done, click "OK".

5.16.3 Pairing SNR VP-80 With A Bluetooth Device

Before connecting SNR VP-80 with other Bluetooth device, users must pair them first. They will stay paired afterwards unless they are unpaired.

- Go to SNR VP-80's Settings;
- Click on Wireless & Networks;
- Click on Bluetooth, and tick Bluetooth to turn it on;
- Click on SEARCH FOR DEVICE;
- The SNR VP-80 scans and displays the IDs of all available Bluetooth devices in range. If the device you would like to pair with does not show up in the list, ensure that the other device is turned on and set to be discoverable;
- If the SNR VP-80 stops scanning before the other device is ready, touch SEARCH FOR DEVICE;
- The discovered device will show in the available devices list with device ID. If it's unpaired, it will show "Pairing" under the device ID. Make sure the Bluetooth device is active in pairing mode. Then tap on the device ID on the SNR VP-80 to pair them. Confirm the passkey in the prompted message (if any). Or if PIN is required, please refer to the device's documentation or other procedures to obtain the PIN.

5.16.4 Un-pairing A Bluetooth Device

After successfully paired, the SNR VP-80 will show item "PAIRED DEVICES" above the Bluetooth device ID in the scan list.

Once it's connected, users could also tap on to the Bluetooth device ID needed to be unpaired, then tap on Unpair in the prompted message.

5.17 USB

The video phone supports USB connection for keyboard and USB storage devices. To use USB keyboard, simply plug it into the USB port on the right side of the video phone and it will be ready to use.

To connect and access USB storage device:

- Insert USB storage device into USB port at the right side of video phone;

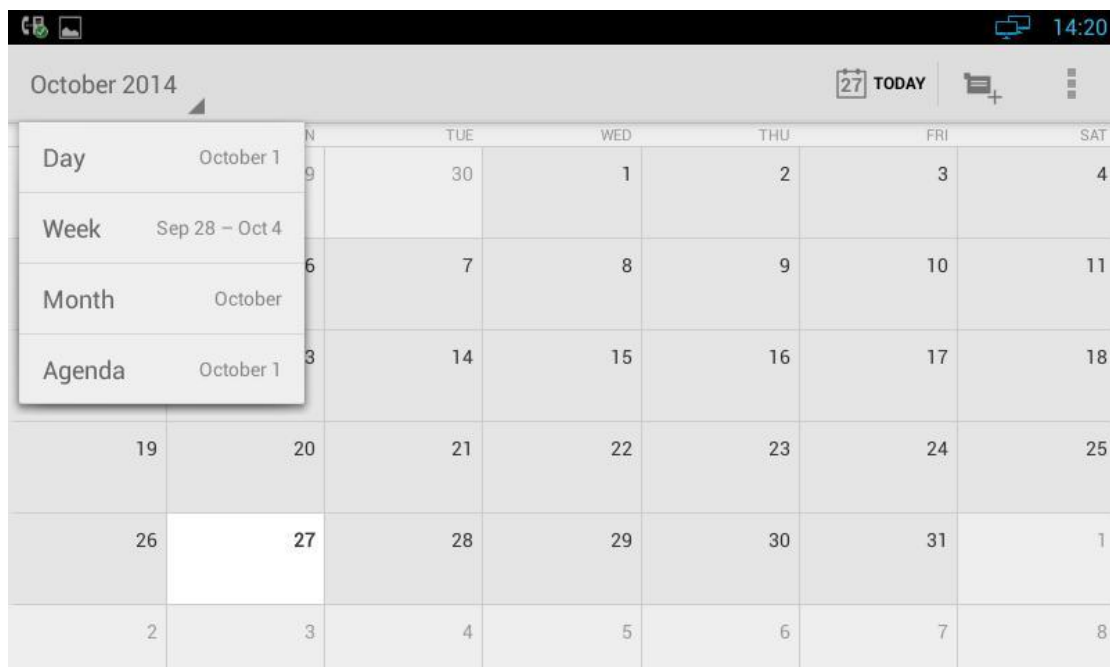

- It will take a few seconds for the video phone to prepare the connection;
- To access USB storage, click on the screen  -> Explorer -> USB, to access and manage your data.

5.18 Calendar

To start the calendar:

- In the main screen, click  -> Calendar;

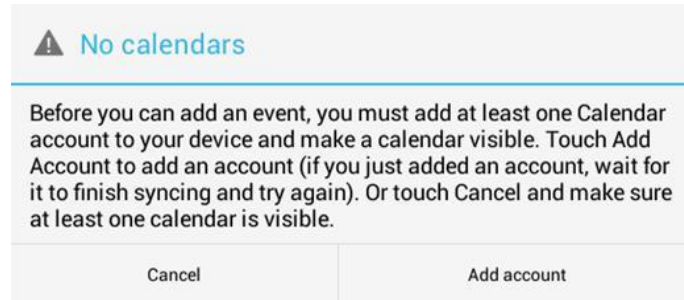

As shown below:

If one day has activity, color will appear on the calendar to remind.

5.18.1 Add An Account

While using the calendar at the first time, it will remind you to add an account.

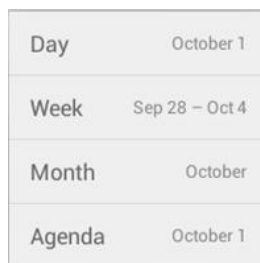

Click "Add account" to add an account, and then synchronize all the schedules of the account to the calendar.

5.18.2 View Calendar

The calendar will display weekly by default, and you can slide the calendar up and down to view the different weeks. In order to view the activities or create the new activities, you can also make the calendar display daily or monthly. While using daily or monthly displaying, you can slide the calendar left and right to view the different day or month.

Click the date on the upper left corner, it will display the drop-down list

, Calendar displaying mode can be selected as daily, weekly or monthly.

5.18.3 New Activities

1) While Calendar is displaying as daily or weekly, you can use the following methods to create a the new activity:

- Click on the date, and then click on the time period;

- Click on  ;

2) Input the details of the activity, as shown below:

Event name

3) Click “Done” to finish.

5.18.4 Edit Activities

You can click on schedule needed to be modified to edit the schedule.

5.18.5 Delete Activities

While viewing the activity, you can click “DELETE” on the upper right corner to delete

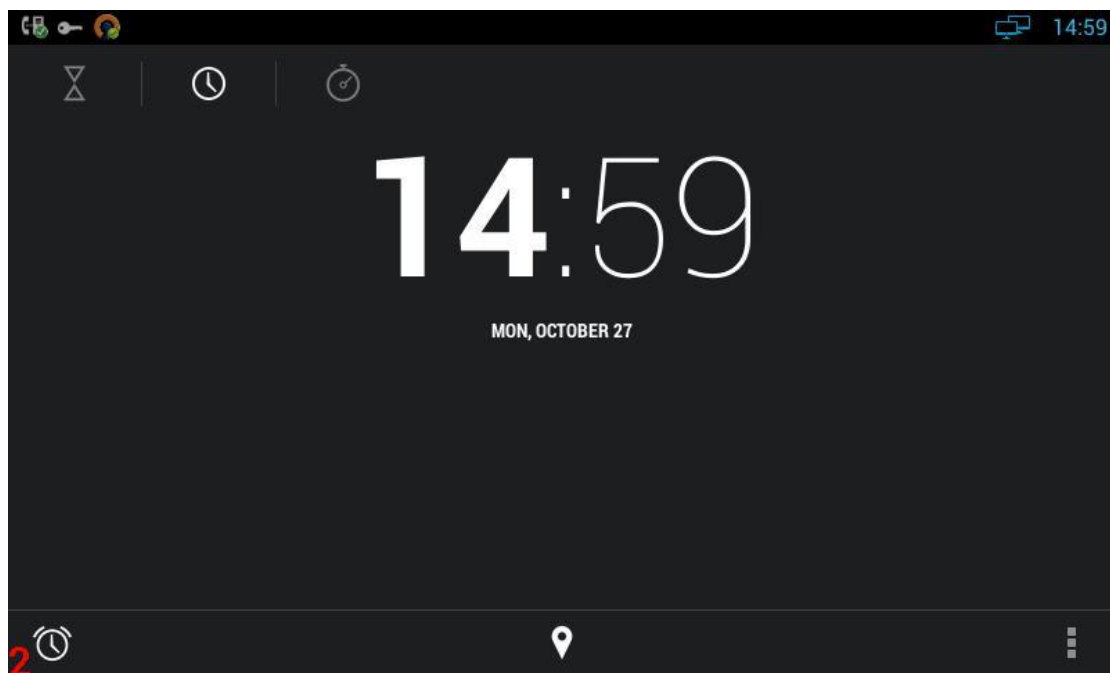

the activity.

5.19 Clock

Enter the Clock:

- In the main screen, click  -> Clock;

As shown below:

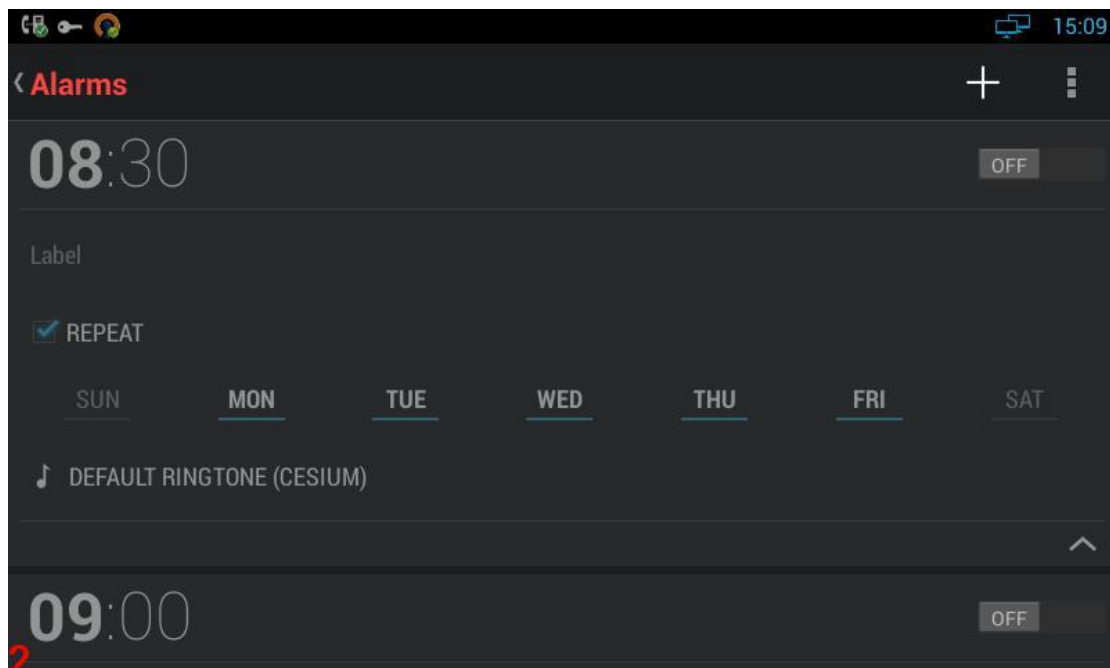

Description:

| | |
|---|-----------------|
|  | Alarm |
|  | Countdown timer |
|  | Stopwatch |
|  | Time zone |
|  | Others |

5.19.1 Alarm

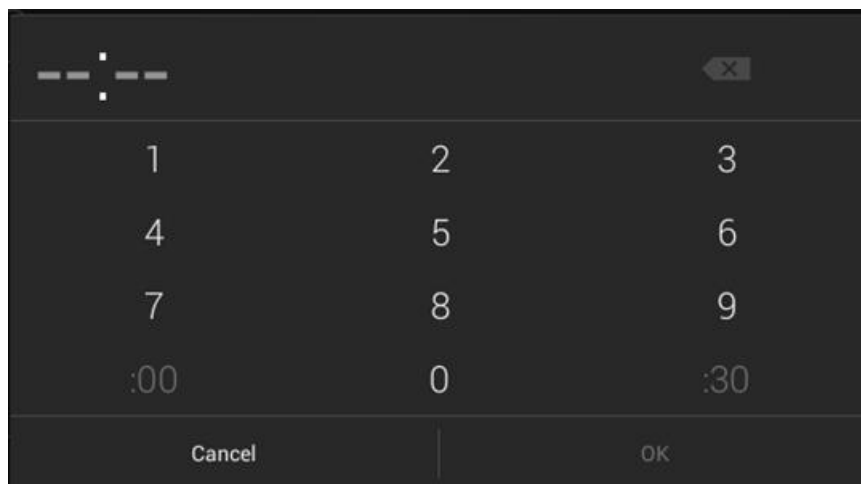

You can add one or multiple alarms:

1) Click ;

2) Click ;

3) Input the time of alarm;

4) If you want to repeat the alarm in some days of a week, please click “REPEAT”;

5) You can choose the ringtone of the alarm.

5.19.1.1 Enable/Disable Alarm

You can click ON/OFF to enable or disable the alarm.

Note: If power off the phone, the alarm will also be off.

5.19.1.2 Modify Alarm

If you want to modify the status of the alarm, including time, repeat data, alarm ringtone, you can directly click on the alarm.

5.19.1.3 Delete Alarm

In Alarm page, you can use the following method to delete the alarm:

- Press and hold the alarm, after pop-up the dialog box, click  , and then click "OK".

5.19.2 Countdown Timer

- 1) Click 
- 2) Click the number to set the countdown time
- 3) Click "START"

Click on the time in the page of countdown timer can stop or continue the time, and the other buttons are described as followed:

| | |
|---|------------------------------------|
|  | Add one minute to countdown timer |
|  | Delete the current countdown timer |

5.19.3 Stopwatch

- 1) Click ;
- 2) Click "START" or "STOP" to start or stop the stopwatch;
- 3) Click the time icon to start a new time;
- 4) When the time is on hold, click to reset the timer.

5.20 Email

Email Application can let you use POP3 or IMAP service to send and receive e-mail.

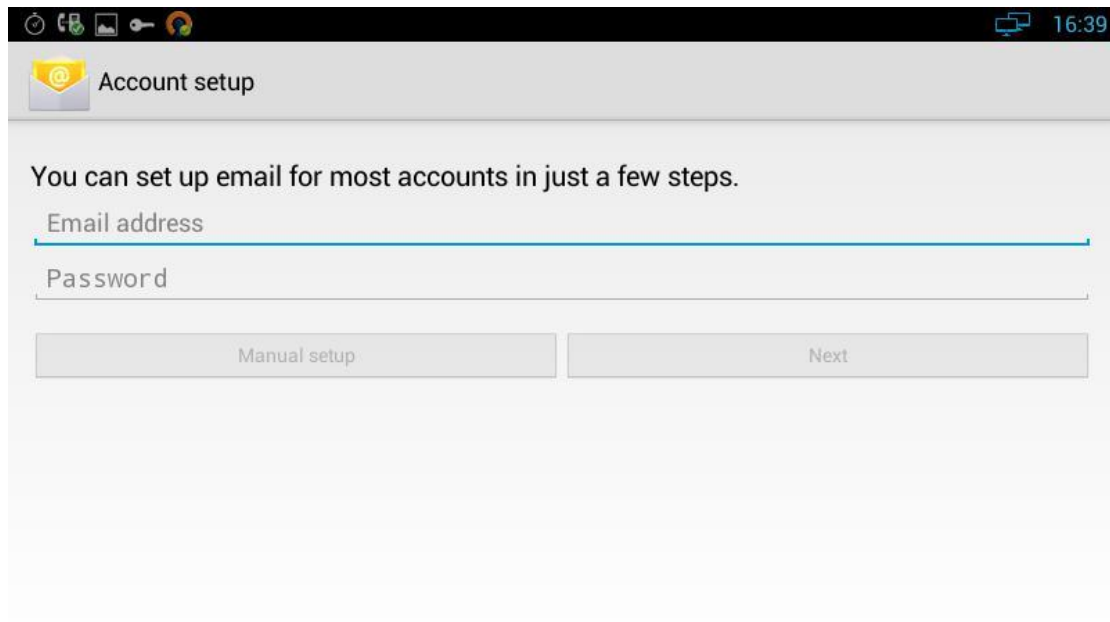

Start Email:

- In the main screen, click  ->Email

5.20.1 Add A New Email Account

Make sure the email account has enabled POP3 or IMAP service, and you can add many accounts.

- 1) Please choose one of the following methods to start:
 - If you haven't added an e-mail account yet, while starting the e-mail application, you will be asked to set up your account, as shown below

- If you have already set up an email account, In the main Email page, Press “Menu” button, and then click “Account”, and last press ”Menu” to “Add Account”.

2) Input the email account and password, and then click “Next”;

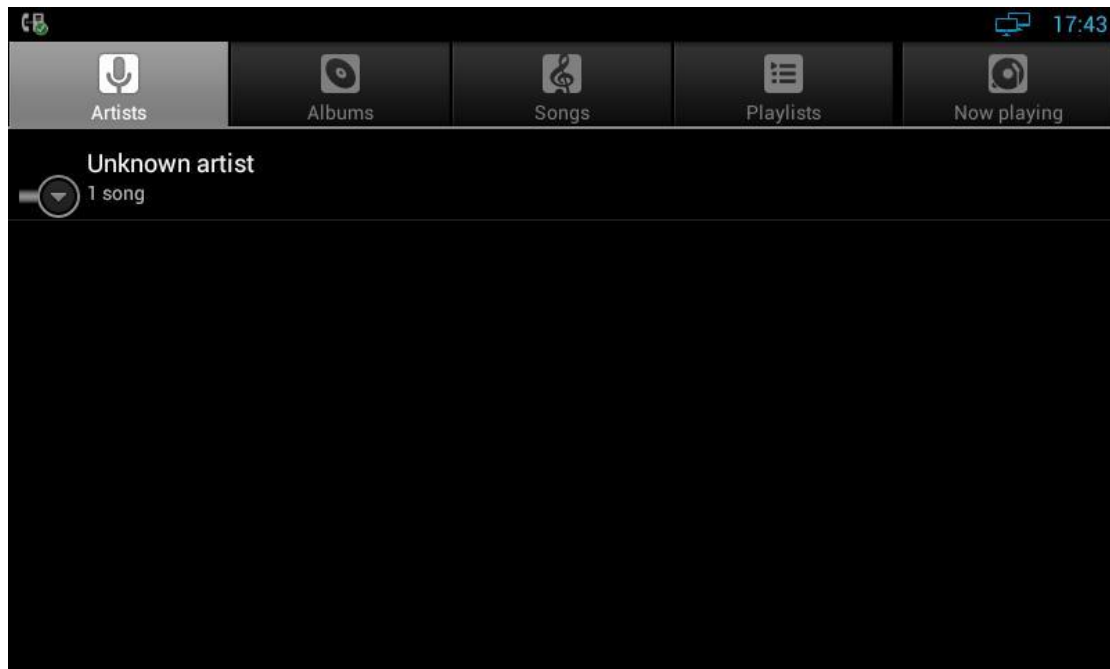

If there is no account type in the equipment database you want to set, the device will require you to enter more detailed information (the receiving server settings and outgoing server settings).

3) Input the account name and your name, click OK.

5.21 Music

In the main screen, click  ->Music.

The music page is shown as below:

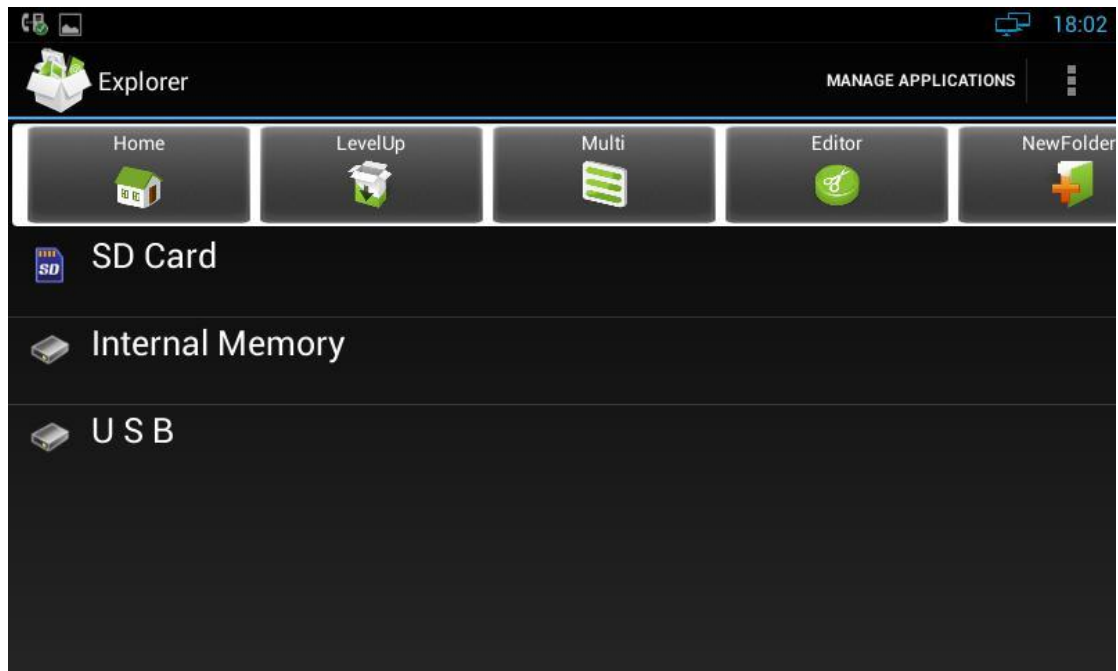

You can click the labels of Artists, Albums or Songs to view all songs. You can also view or play the songs from the playlists.

To view the currently playing song, please click the "now playing" label.

5.22 Explorer

You can use explorer to manage the files in the device.

In the main screen, click  -> Explorer, as shown below:

| | |
|---|---|
|  | Home Page |
|  | Upper Layer |
|  | Multiple Choices, And the selected file will change to blue color. |
|  | Editor, you can do Copy, Delete, Move, Paste, Rename, Send, Create shortcut operations. |
|  | New Folder |
|  | Previous File |
|  | Next File |
|  | If you insert a SD card, you can view the files in SD card. (Optional) |
|  | View the internal files of the device |
|  | View the files in inserted USB device |

5.23 Video Player

You can use video player to play local videos.

To run the video player: In the main screen, click  -> Video

After entering, you can click on the list of videos to watch. As shown below:

| | |
|---|---|
|  | Bookmark |
|  | Screen Brightness Adjustment |
|  | The previous video, and long press to make video fast backward. |
|  | Hold/Play |
|  | The next video, and long press to make video fast forward. |
|  | Screen size adjustment, four type of video sizes: original size, full screen, 16:9, 4:3 |
|  | Floating browse mode |
|  | Others |

5.23.1 Floating Browse Mode

Click on  during playing a video to enter the floating browse mode. As shown below:

You can click on  to play the video, click  to shrink the floating window. And use two fingers to press on the screen, shrinkage or expansion to adjust the window size.

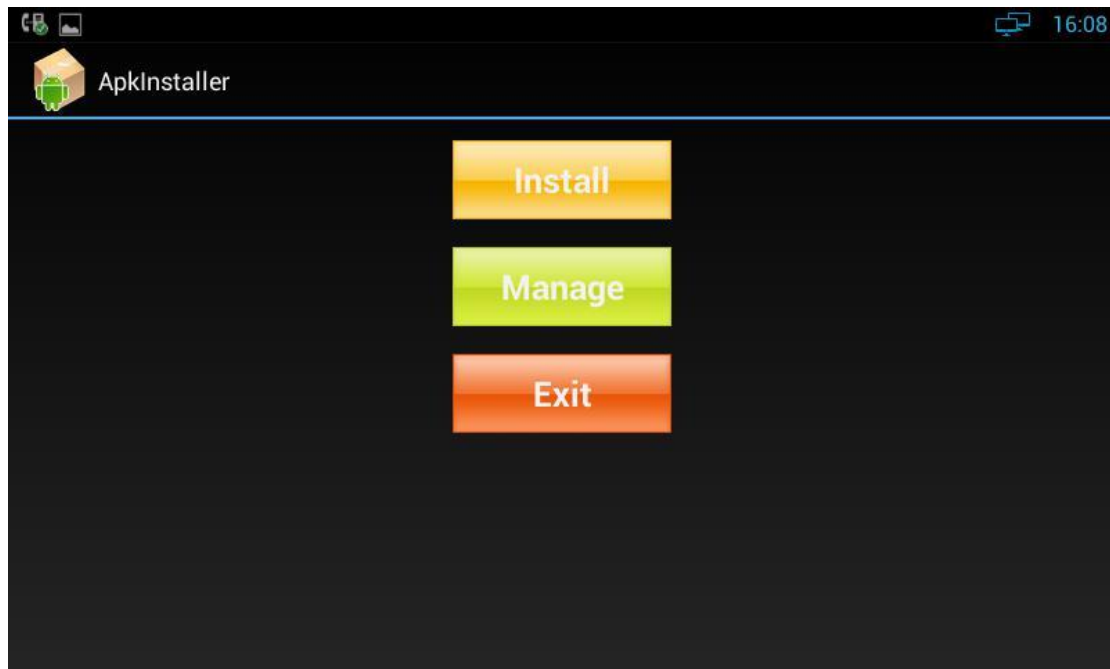

If you want to close the floating window, please long press the floating window until it displays  icon in the center, click on the icon to close the floating window.

5.24 Others

5.24.1 Apk Installer

You can use Apk Installer to install the apk application

In the main screen, click  -> Apk Installer. As shown below:

5.24.1.1 Install

You can click "Install", and then browse the path:

The system will list all the Apk applications under the path, click the Apk to install.

5.24.1.2 Manage

You can click on "Manage" button to browse the Apk installed in the system.

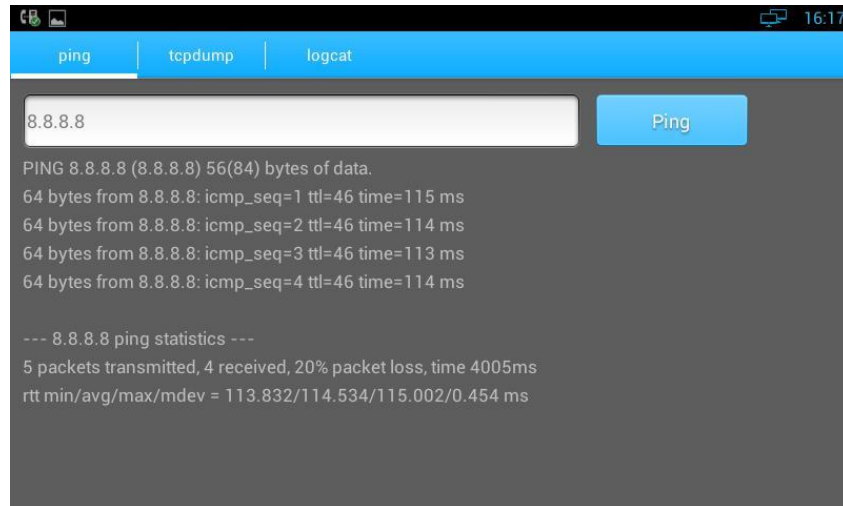

5.24.2 Ping Tool

You can use the Ping tool for Ping query, network packet capture and view the

log information.

5.24.2.1 Ping Query

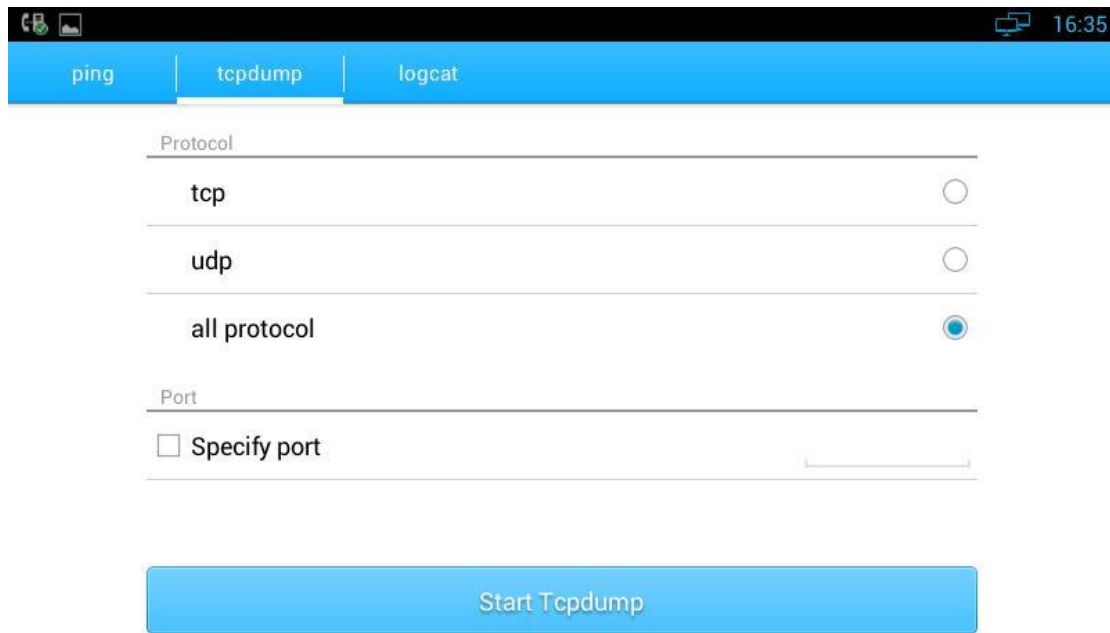

Ping query interface is as shown :

You can input the address you want to Ping, click the Ping button, you can view the Ping query results. If you take a long Ping query, in the input box, please manually enter the Ping + address, such as: , and then click the Ping button.

5.24.2.2 Tcpdump

Log captured tool interface is as shown:

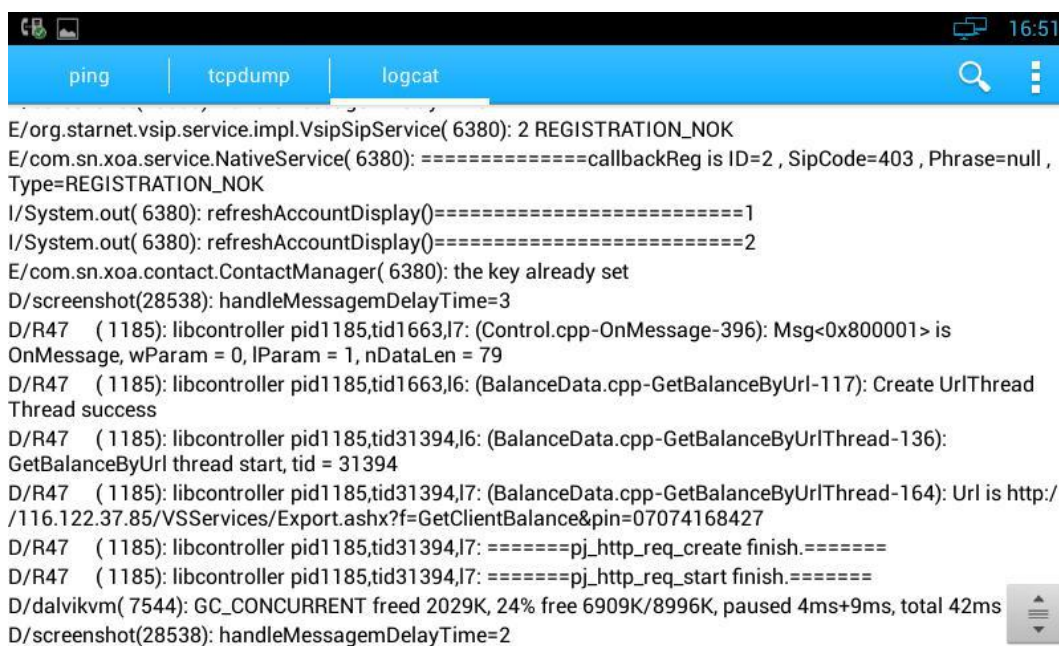

You can choose what type protocol and specified port you need to capture the logs. Press “Start Tcpdump” to start the log captured.

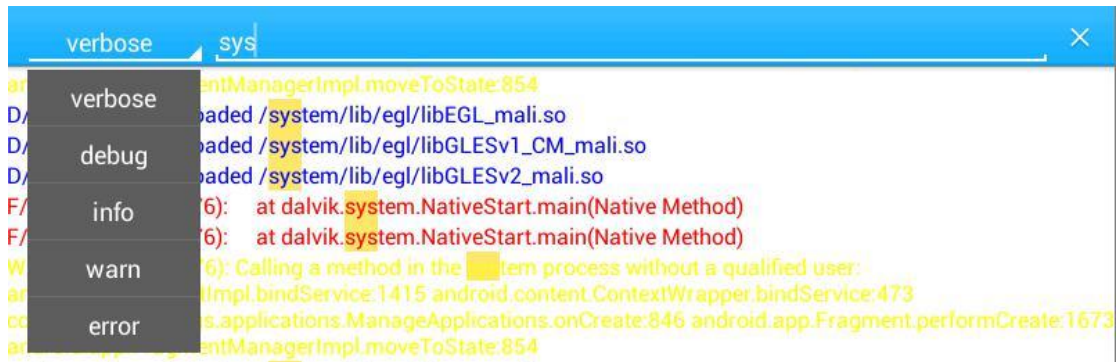

If you want to finish the log captured, you can press “Stop Tcpdump” to stop the capture, and the system will prompt the file saved path. You can use Wireshark and other tools on PC to read the logs.

5.24.2.3 Logcat

Logcat interface is as shown:

You can use , enter the key word to search the log information, and select the log level through the drop-down list.

Or click  to see more options.

if you need to save the log, please click , select "Save".

If you need to highlight the log information, please click , select "highlight", and then the log will be showed as different color.

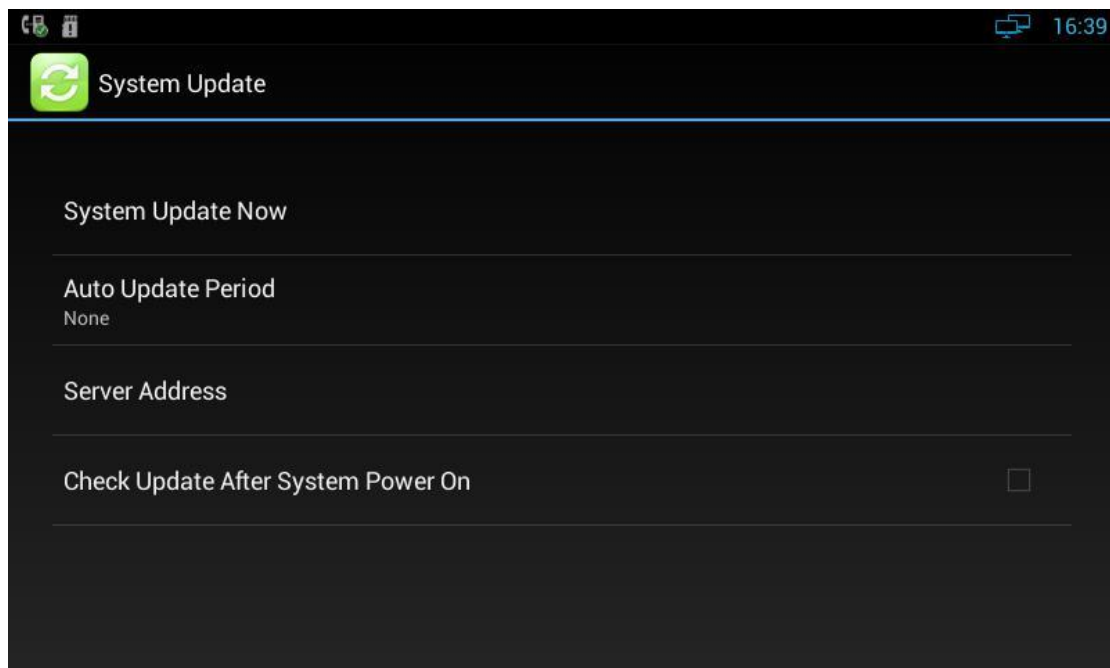

6 Software Upgrade

6.1 Immediate Update

Choose one way below to enter the system upgrade interface:

- In the main screen, press “Menu” on board -> System Settings -> System -> About Multimedia Terminal -> System Upgrade -> System Update Now
- In the main screen, tap on settings icon  -> System -> Multimedia Terminal -> System Upgrade -> System Update Now

Update interface as shown:

Three ways to update immediately: Select other upgrade package, Local Update, Remote Upgrade, as shown:

6.1.1 Select Other Upgrade Package

1) Via USB to Upgrade

Put upgrade package into USB, insert USB, then click “Select other upgrade package”, find “/mnt/usb_storage”, find the upgrade package, then click “OK” to upgrade.

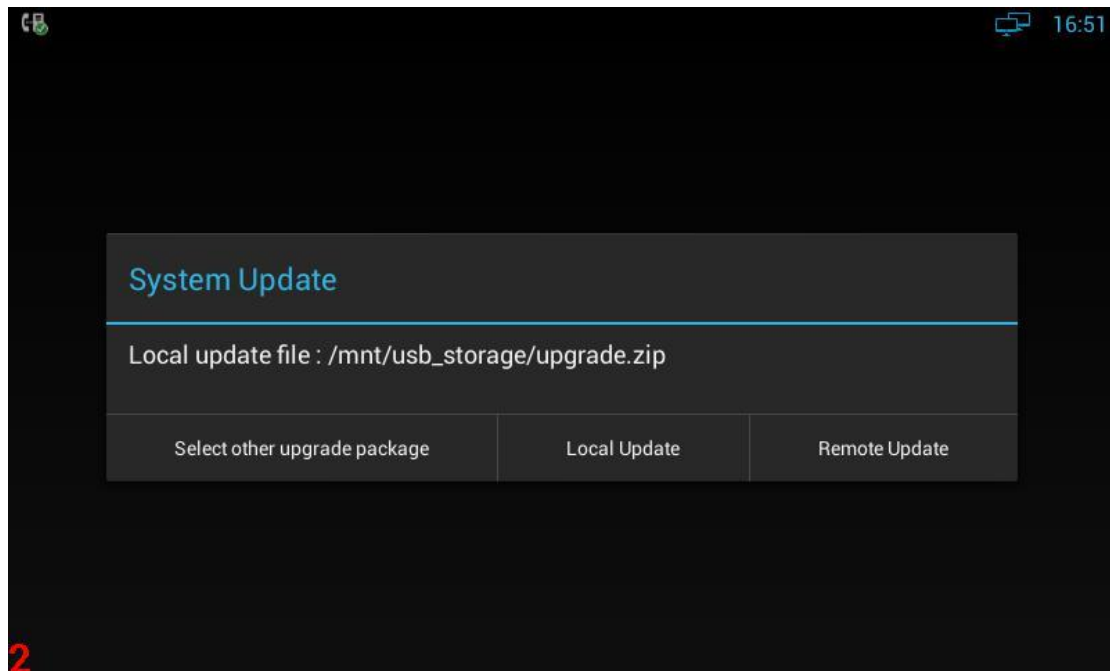

2) Via Internal Memory to Upgrade

Use USB to copy the upgrade package into Internal Memory, then press “Select other upgrade package”, find “/mnt/sdcard”, find upgrade document, then click “OK” to upgrade.

6.1.2 Local Update

1) Via USB to Upgrade

Change the name of upgrade package into upgrade.zip, then copy it into USB, insert USB, enter the upgrade interface, you will find the path of upgrade package, because video phone has searched it automatically, click “Local Update” to start upgrading, as shown below:

2) Via built-in SD Card to upgrade

First, change the name of upgrade package into upgrade.zip, then copy it into USB, and then use USB to copy the upgrade package into Internal Memory, enter the upgrade interface, you will find the path of upgrade package: /mnt/sdcard/upgrade.zip, because video phone has searched it automatically, press “Local Update” to start upgrading.

6.1.3 Remote Update

1) Enter the interface in figure 5-1, click “Server Address”, and input the server address that contains upgrade package. As shown below:

2) Click “Remote Upgrade”, video phone will check the new version automatically. If exist a new version, it will prompt. Press “OK” to download upgrade document.

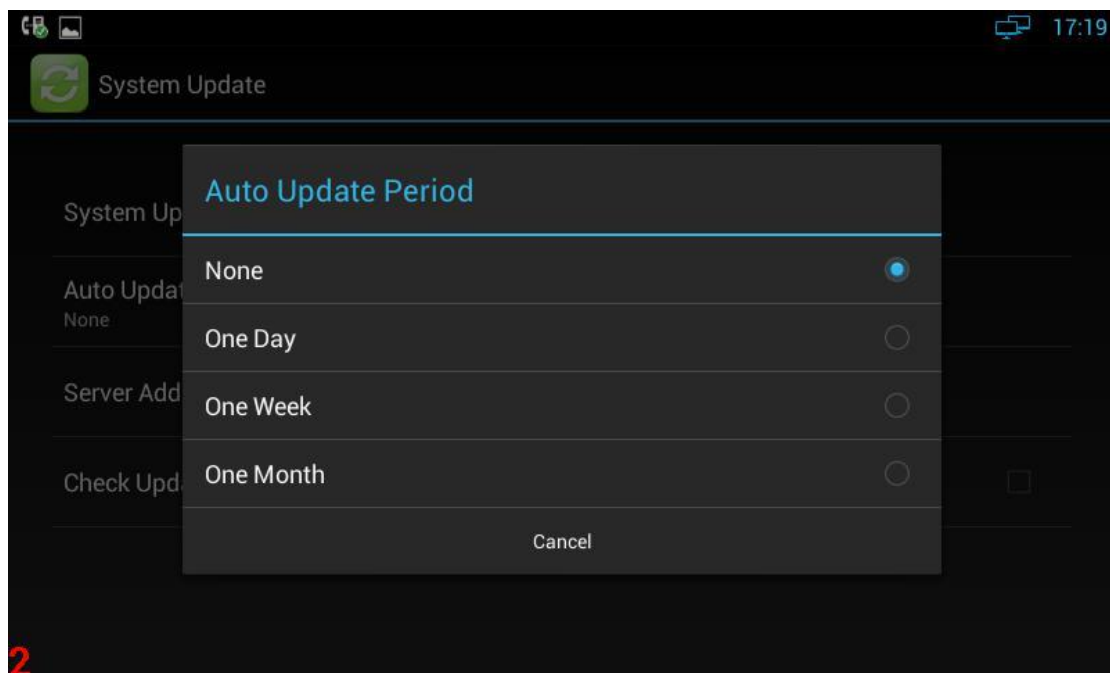

3) After finish downloading, it prompts “Download update image success! You need to restart system for update! ”, press reboot now, and then system will upgrade automatically. As shown below:

6.2 Auto Update Period

Auto Update Period includes four modes: None, One Day, One Week, and One Month. The terminal will detect the new version automatically in time, if there is, the status bar will show “There is a new version, please update!”. Click and download the image for upgrade.

As shown below:

6.3 Upgrade on the web

1. Click Upgrade->Basic
2. Choose the software you want to update from the computer.
3. Click .

6.4 Check Update After System Power On

Click “Check Update After System Power On” in figure 5-1. Every time you power on, the system will check the new version automatically. If there is a new one, the status bar will notice: “System has new version, please update now!”, click and download the image for upgrade.

As shown:

7 System Maintenance

7.1 System State Inspection

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> About Multimedia Terminal

Mode 2: In the main screen, click  ->  -> About Multimedia Terminal
It will display phone status, software version and hardware version in this item.

7.2 IP Query

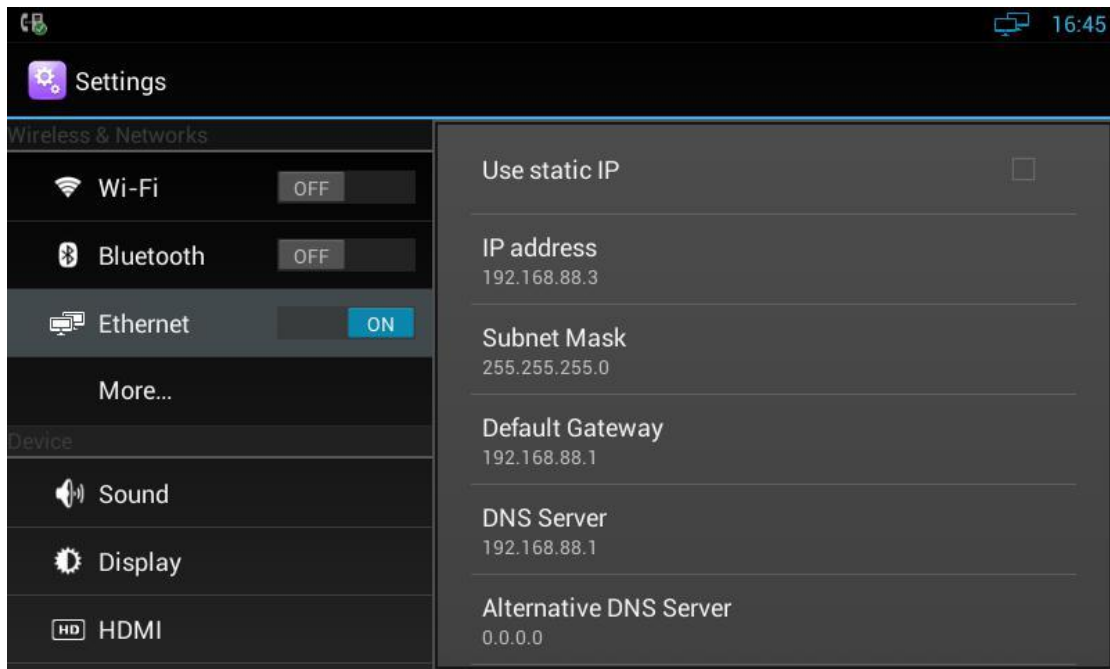

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Ethernet

Mode 2: In the main screen, click  ->  -> Ethernet

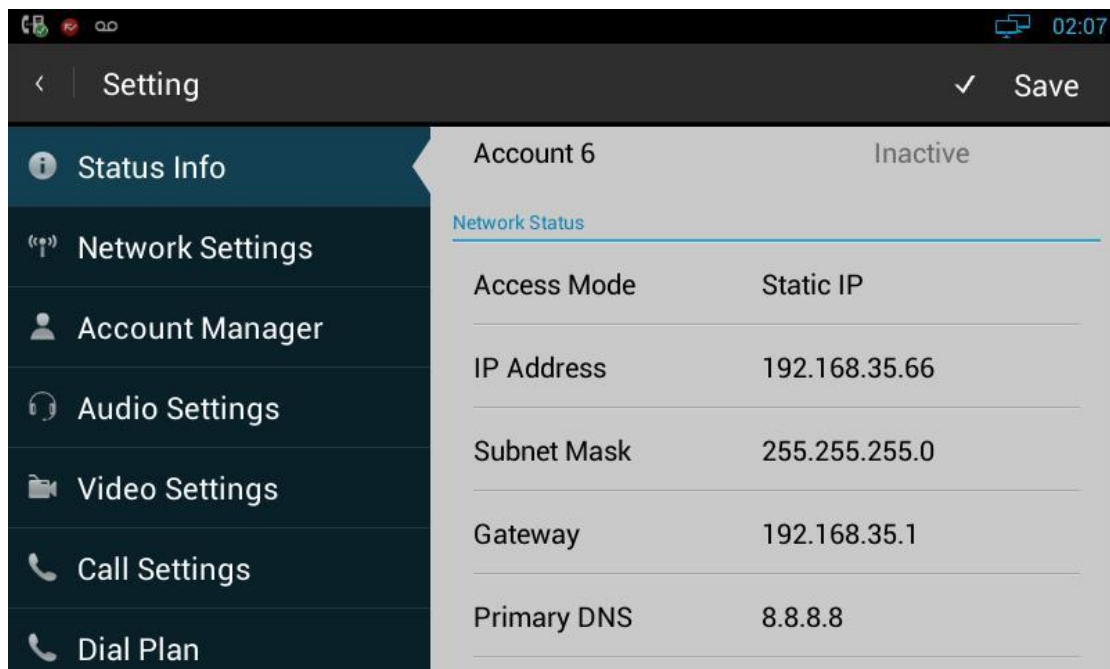

Mode 3: Press Speaker button or pick up to enter the dialing interface, click  on upper right corner -> enter the setting interface, check Status Info;

Mode 4: Slide down the top-left , click the account, enter the setting interface, check Status Info;

Mode 1 and Mode 2 can check IP address, subnet mask, gateway, DNS server etc. in Ethernet.

Mode 3 and Mode 4 can check the corresponding network information in setting interface.

7.3 SIP Account Registration Query

You can choose one of the following methods to enter the SIP account registration query. If the account is successfully registered, the icon will be light up in notification area of phone.

Mode 1: Press Speaker button or pick up to enter the dialing interface, click  on upper right corner, check Account Manager.

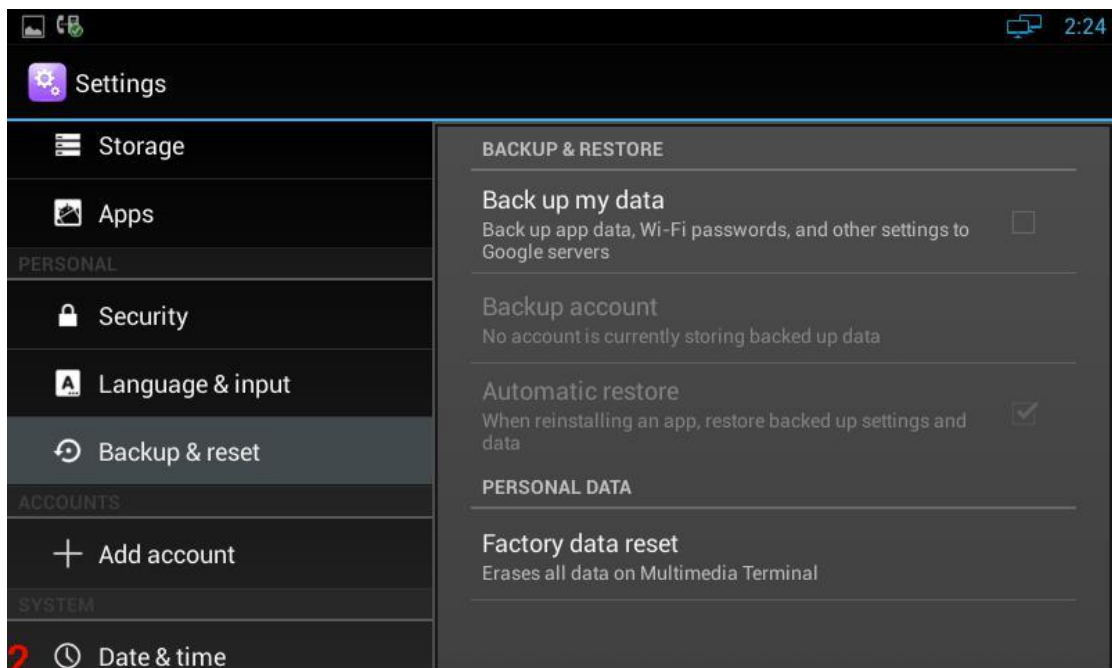

Mode 2: Slide down the top-left , click the account, enter the setup interface, check Account Manager.

7.4 Backup & Reset

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Backup & reset

Mode 2: In the main screen, click  ->  -> Backup & reset

Click "Factory data reset", click "Reset Multimedia Terminal", then the phone will restore to factory settings.

7.5 Failure Process

Failure 1: Power LED is off

- Please check whether the adapter fits this product requirement;
- Please check whether the outlet is working properly.

Failure 2: No voice when pick up the handset

- Please check whether the connection of handset is working properly;
- Please adjust the volume + key on keyboard when off-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume (call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change call volume when on-hook the phone.

Failure 3: Phone can’t dial properly

- Please check whether there is  at the top-right of screen. If not, please check whether the cable in LAN port is loose;
- Please check the IP address of phone via configuration (go to 4.2, “network configuration”);
- If it’s now in LAN, please check whether the IP address of phone is conflict with other devices in the same LAN.
- If the network connection is properly, please check whether the icon  of successful registration is in the notification area. If there is no explanation of configuration failure, please contact network administrator to recover it.

Failure 4: No ringing when incoming a call

- Please make sure the handset is completely hung on the base
- Please adjust the volume + key on keyboard when on-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume (call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change ring volume when off-hook the phone.

8 Web Interface

8.1 Web login

1. Open the browser on your computer.
2. Input the IP address in the address bar.
3. Enter the user name and password (user name: admin, password: admin), then click .

8.2 Status->Basic

Click Status->Basic to check the phone information.

| Status | |
|----------------------------|----------------------------------|
| Product Information | |
| Model | VP-R47P |
| Hardware Model | VP-R47P |
| MAC Address | C40938BA10F4 |

Filter forgetting factor base 250 (0~255)

| Sections | Description |
|-----------------------|--|
| Echo Canceller | Echo Canceller: To remove acoustic echo from a voice communication in order to improve the voice quality . |

| | |
|--|---|
| | <ul style="list-style-type: none"> ● VAD(Voice Activity Detection): Allow IP phone to detect the presence or absence of human speech during a call. When detecting period of “silence”, VAD replaces that silence efficiently with special packets that indicate silence is occurring. It can facilitate speech processing, and deactivate some processes during non-speech section of an audio session. It can avoid unnecessary coding or transmission of silence packets in VoIP applications, saving on computation and network bandwidth. ● CNG(Comfort Noise Generation): Allow IP phone to generate comfortable background noise for voice communications during periods of silence in a conversation. It is a part of the silence suppression or VAD handling for VoIP technology. CNG, in conjunction with VAD algorithms, quickly responds when periods of silence occur and inserts artificial noise until voice activity resumes. The insertion of artificial noise gives the illusion of a constant transmission stream, so that background sound is consistent throughout the call and the listener does not think the line has released. |
| Mic Volume | To configure Microphone volume for handset mode. |
| Automatic Control Generation | <p>SNR VP-80 will auto adjust amplification circuit gain via signal.</p> <ul style="list-style-type: none"> ● Automatic Gain Control(Sending-side): Disabled by default ● Automatic Gain Control(Receiving-side): Disabled by default ● Automatic Gain Control Target: Range from 1 to 20 dB. 3dB by default. |
