7. Changes in This Release

New Features in This Release None.

Old Features Removed From This Release

None.

Problems Resolved in This Release

In a hybrid stack with a DMLT configured on the first two BPS2000 units, the DMLT stops forwarding traffic whenever one of the BayStack 450 units leaves the stack (Q01105484).

8. Outstanding Issues

In a hybrid stack with a DMLT configuration, changing the STP state of the trunks may result in an inconsistent DMLT configuration (Q01151885-01). This issue will be addressed in the upcoming BayStack 450 4.5.4.

Port path cost on a BPS2000 copper MDA may change to an incorrect value (Q01158269).

9. Known Limitations

None.

10. Documentation Corrections

For other known issues, please refer to the product release notes and technical documentation available from the Nortel Technical Support web site at: http://www.nortel.com/support.
