Yealink

MShare - Screen Sharing Box

The Yealink MShare, a content sharing unit with both HDMI and Mini-DP input, it allows users to present content from laptop. Using the Yealink wireless presentation pod WPP20, users are able to do wireless presentation for even more flexibility. Simply plug in the WPP20 to share content with a single click.

Key Features:

● 1080P/30FPS Screen Sharing

Immediate response, smooth and trouble-free presenting, 1080P/30fps FHD and low-latency content sharing, all of these allow you to enjoy an excellent collaboration. MShare presentation solution covers all devices you are using, simply connect and to share from your MacBook or Windows laptop.

● Multiple Interfaces for video & audio

Yealink MShare provide both HDMI and mini-DP port for audio embedded screen sharing, helps to cover different type of devices you are using.

● Bulit-in AP for wireless sharing

Combining a self-built 2.4G/5G Wi-Fi, Yealink Mshare allows you share your screen by Yealink WPP20 with no routers or extra network configuration required, just plug-in and simple one-click, the content will be displayed immediately.
